

Madhya Pradesh State Biodiversity Board, Bhopal

Final Technical Report

i. Name & Address of PI: Prof. Ashok K. Jain
Hon. Director
Institute Of Ethnobiology
Jiwaji University, Gwalior (M.P.)

Tel. no. : 0751-4016771 (O); 2343197 (R)

E-mail : asokjain2003@yahoo.co.in

ii. Title of the project : “Plant Diversity of Chambal Region with Special Reference to the Conservation Strategy of Threatened Taxa.”

iii. Date of Sanction of the project : Letter no. 516/ BD Board, dated 12/5/2005

iv. Actual date of starting of project : 1st June 2005

v. Name of Project Fellow: Mohan G. Vairale

1. State of the art:

Madhya Pradesh, the state occupying the maximum land, harbour a rich flora and fauna. A large number of plants, which are important medicinally or otherwise, occur in this state. These plants are used for medicinal and other material culture several threatened, endangered and endemic species have been reported from the bioreserved of Madhya Pradesh. But many species are still vanishing due to improper management and requires immediate attention (Jain 1996).

In the areas like Pachmarhi, Amarkantak, Jhabua, Kanha, Abusmarh etc. the management of biodiversity is required in such a way so that there could be sustainable use of threatened resources. The socio-economic aspects of local people also get uplifted after the eco-development.

Several species of plants in this state of Madhya Pradesh have potential for better economic exploitation. Ethnobiology has been used as an organizing focus to assess human adoptive responses and human impact on biodiversity. Alcorn (1984) emphasized that once a species gets known as resources in any cultural groups it becomes an integrate part of that society. The impact of this knowledge on expansion, distribution, threats, to that species and in cases of even its extinction, plays a great role.

Northern part of Madhya Pradesh comprises of Chambal region, which includes Gwalior and Chambal divisions. Region encompasses eight districts namely Gwalior, Bhind, Morena, Sheopur, Shivpuri, Datia, Guna, and Ashok nagar. Vegetation of Chambal is interesting due to various regions. Districts of Bhind and Morena shows ravines and xerophytic vegetation, while forest of Shivpuri, Sheopur and Chanderi are of lush green forest, whereas teak forest of Guna shelter a variety of vegetation.

Vegetation of Chambal region encompasses mainly two types of forests viz. Tropical dry deciduous forest and Tropical ravine thorn forest. Tropical dry deciduous forest dominantly shows trees such as *Anogeissus latifolia*, *Anogeissus pendula*, *Boswellia serrata*, *Acacia* sps., *Zizyphus* sps., *Lannea coromandelica*, *Tectona grandis* etc. While Tropical ravine thorn forest shows *Acacia* sps., *Zizyphus* sps., *Prosopis cineraria*, *Mimosa* sps., *Flacourtie indica*, *Commiphora wightii* etc.

There are 3 distinct seasons winter, summer and rains. The mean daily maximum temperature varies from 18^0 C during January to 44^0 C during May and Mean daily minimum temperature varies from 5^0 C during January to 28^0 C in May. The average mean rainfall of the region is around 600 mm.

2. Objectives:

- Survey of phytodiversity of the eco-region covering Chambal district including Gwalior, Bhind, Morena, Datia, Sheopur, Shivpuri, Ashok nagar and Guna districts.
- Identify RET and endemic species and their current status in the eco-region.
- Assess threats to the survival of RET species in the eco- region.
- Survey of focal species (8-10 prioritized on the basis of significant economic value and Socio-Religious value) and ascertain their status.
- Suggest list of representative and RET and endemic species to be planted in identified areas for Botanical garden.

3. Outcomes:

- Status reports on phytodiversity of the eco-region.
- Status report on rare and endangered endemic species of the eco-region and the threats to their survival.
- Inventory Book of the most endangered species endemic to the eco-region
- Status report on focal species of eco-region.
- List of species for planting in Botanical garden and layout for such species in the area selected for Botanical garden.

4. North Madhya Pradesh - A Profile: (Study Area)

The North Madhya Pradesh comprises eight districts namely Gwalior, Bhind, Morena, Shivpuri, Guna, Datia, Sheopur and Ashoknagar. The description of selected districts with reference to climate, topography and boundaries are given below.

4.1 Gwalior District:

The district is named after its headquarters town Gwalior. The district is situated in the northern part of the state and lies between latitudes $25^{\circ} 34'$ N and $26^{\circ} 21'$ N and longitudes $77^{\circ} 40'$ E and $78^{\circ} 54'$ E. One peculiar feature of the district is that it is not a compact one. Of the three tehsils of the district, Bhander tehsil lies separated by some enclaves of Datia district. The other two tehsils viz., Pichhore and Gird however, form a compact area. The Gird and Pichhore tehsils are bounded by Bhind district in the northeast, Datia in the east, Shivpuri in the southwest and Morena in the north and northwest. The other part of the district, i.e., the Bhander tehsil is surrounded by Bhind district in the north, in the west by Datia district and in the south and east by Jhansi district of Uttar Pradesh.

The district covers an area of 5214 sq. kms. Which is a little more than 1.17 percent of the total area of the state. The district headquarters is located at Gwalior. The district lies at junction of the Malwa Plateau in the southwest and the gangetic plain in the north and east. The district except for an outcrop of Vindhyan Sandstone near Gwalior, which brings the Malwa Plateau to an end. The highest hill feature being 1454 in Sirkoli forest. Topographically it falls into four main divisions, the plateau division in the west, northeastern plains.

4.2 Bhind District:

Bhind district, in Chambal division, is situated in the northern corner of the state and lies between latitude $25^{\circ} 25'$ and $26^{\circ} 48'$ N and longitude $78^{\circ} 12'$ and $79^{\circ} 05'$ E. Morena and Gwalior districts in southwest, Datia district in south, Jalaun, Etawah and Agra districts of Uttar Pradesh in the east bound the district, north and northwest respectively.

Total area of the district is 4459 sq. kms. The district headquarters is located at Bhind. The district is situated on the northern the following three natural regions viz., (1) Chambal-Asan Ravines, (2) Bhind plain and (3) Sind-Pahuj Ravines.

This district of Madhya Pradesh is geographically known for its Ravines, Fertile land and dense Forests. Bhind was one among the 16 districts of United State of Madhya Bharat, which was constituted on

28th May 1948. Subsequently, as a result of reorganization of States in November 1956, district Bhind became part of new Madhya Pradesh. Formerly there were 4 Tehsils viz; Bhind, Mehgoan, Gohad and Lahar but at present there are 7 Tehsils viz; Bhind, Ater, Mehgaon, Gohad, Mihona, Lahar and Raun. As per the history, the District is named after the Bhindi Rishi (Sage Bhindi).

The soil of Bhind is very fertile and is well drained by the Chambal and Sind rivers and the tributary streams of the Kunwari and Puhuj. It is well known fact that the region has been subjected to depredations of dacoits, robbers or thugs since ages. The majestic Chambal surrounded yawning chasms and gaping beehads (ravines) provide an ideal setting to this murky banditry in a big way. Even during Mughal times the powerful administration failed to curb these menace. As many as 216 dacoits were shot dead and 697 arrested in Bhind district alone from 1959 to 1963. Five rivers which flow around the district mainly Pahuj, Sindh, Kunwari, Chambal and Yamuna meet together in an area of 2 kms named as "PACHNADA" the place just neighboring to the district are actually located in U.P. but this is a rare phenomenon where five rivers confluence at one juncture.

4.3 Morena District:

Morena, also known, as Muraina is a town situated in the northwest corner of the state. The name Morena is derived from the word 'Mor' means peacock that was found in abundance. It is the headquarters of the division of Chambal. Morena is situated in the Chambal valley northwest corner of the state and lies between latitude $25^{\circ} 15'$ and $26^{\circ} 62'$ North and longotude $76^{\circ} 22'$ and $78^{\circ} 42'$ East. Total area of the district is 11594 sq. kms. The district has two distinct features viz., (i) area covered with plains criss-crossed by rivers and ravines. (ii) The other covered with forest. The district headquarters is located at Morena. The district is bounded by Agra district of Uttar Pradesh in the north; Bhind district in northwest; Gwalior and Shivpuri district in southeast. The northern boundary of the district is carved out by river Chambal and the northwest boundary by river Parvati. In shape it looks like a gourd. It is one of the most populous districts in the Chambal valley. The Chambal, which originates in the Indore district, forms the northwestern boundary of Madhya Pradesh with Rajasthan. The important rivers like Chambal, Kunwari, Asan and Sank drain the district. Flowing through the length of 435 kms, the river Chambal is one of the country's most beautiful and least polluted river systems.

Wheat is the most important food grain grown in the district. Mustard is the most important oil seed grown in the district. Major kharif crop is Bazra. On the whole Morena district with rich agricultural tract, is in the stage of development. The topography is also gradually changing with the reclamation of ravines for agricultural purpose, through the Chambal Ayacut Development Project.

The dubious diction of Morena being region of dacoits, since dacoits have been part of the life in the district, is gradually fading. It is hoped that with the pace of agricultural and Irrigation are taking place Morena will be one of the highly prolific, developed & prosperous district of the State in due course of time.

4.4 Shivpuri District:

Total area of the district is 10,278 sq. kms. The district headquarters is located at Shivpuri. Morena, Gwalior and Datia districts, on the east by the Jhansi district of Uttar Pradesh, on the west by Kota district of Rajasthan and on the south by Guna district bound Shivpuri district on the north. It lies between $24^{\circ} 6'$ - $25^{\circ} 6'$ North latitude and $77^{\circ} 0'$ - $78^{\circ} 4'$ East longitude. The district can be divided into 3 main divisions based on their geology.

The Bundelkhand trap: It comprises mostly pre-dharwarian granites, which consists of sparsely cultivated uplands and shallow valley. It covers eastern half of the district with an area of 1539 sq. miles (3985.99 sq. kms.) approximately.

The Upper Vindhya: Sandstones of Kaimur, Rewa and Bhander are commonly found in this region. The dips are very shallow and this suggests that there has been a very little disturbance since Vindhyan period. This region occupies the Western half of the district.

The Deccan trap: It mainly constitutes undulating plains and flat-topped ranges of the hills. It covers an area of 426 sq. miles (1102.34 sq. kms.) towards the southern parts of the district viz. towards Bhadarwas and Barokra. Laterite and aluminums are also found in the region and cover an area of 374.80 sq. miles (968.66 sq. kms.).

4.5 Datia District:

Datia district is situated in the northern part of the state and lies between the latitude $25^{\circ} 28'$ North and $26^{\circ} 20'$ North and longitude $78^{\circ} 10'$ East and $78^{\circ} 45'$ East. The district lies into a main body of the land mostly on the Sind-Pahuj Doab and five enclaves surrounded by the Shivpuri district and the surrounded Jhansi district of Uttar Pradesh. Bhind and Gwalior districts in the north bound the district. Shivpuri and Jhansi districts in the south, again Gwalior and Shivpuri in the west and Bhander tehsil of Gwalior in the east. Total area of the district is 2038 sq. kms. The district headquarters is located at Datia.

4.6 Sheopur Kalan District:

Sheopur is located at northern part of Madhya Pradesh. The important rivers like Chambal, Seep and Kuno drain the district. The Chambal, which originates in the Indore district, forms the northwestern boundary of Madhya Pradesh with Rajasthan. Total area of the district is 6,66,081 sq. kms. The forest area is 2,82,818 sq. kms. Which is 43.7% of total area of the district. The district headquarters is located at Sheopur.

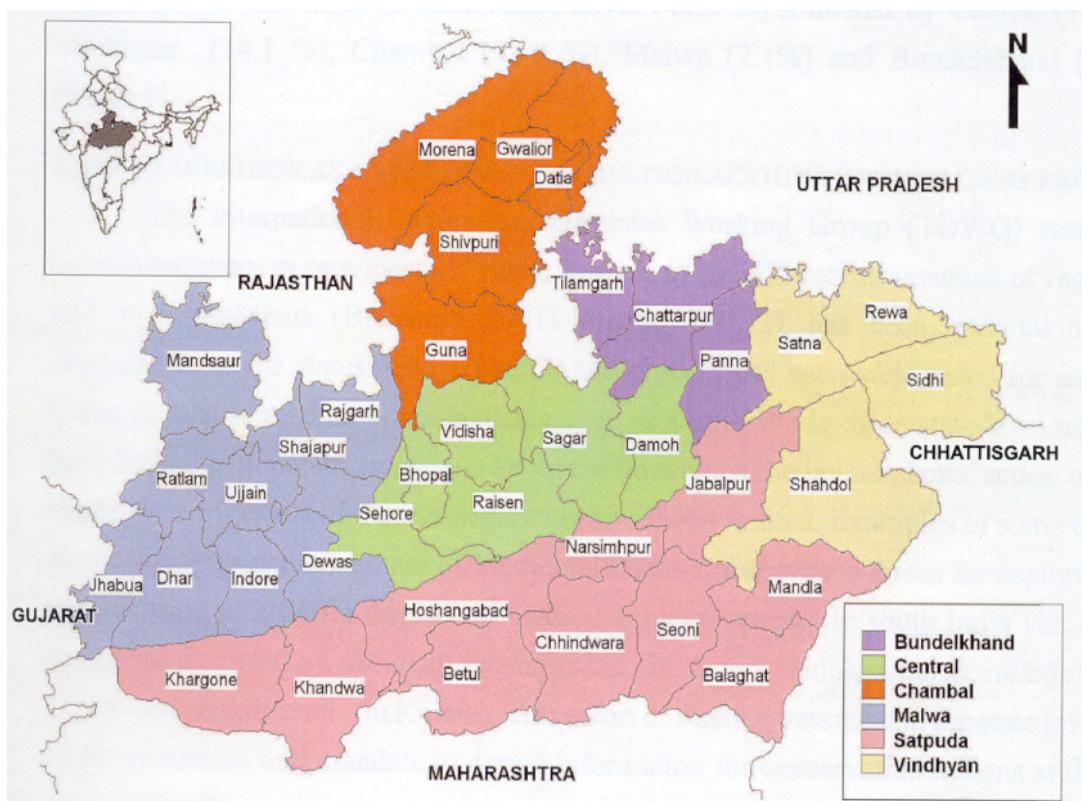

The art of woodcarving has flourished in district Sheopur and the beautifully embellished wooden ceilings, doors and lintels with finely carved designs are silent testimonials of its glory. The wood carvers of Sheopur, with great sensitivity and skill transform different varieties of wood. The crafts persons of Sheopur make pipes, masks, toys, doors, stands, windows, and wooden memorials, flower vases, bedposts and cradle posts etc.

4.7 Guna District:

Guna, an administrative district of Madhya Pradesh is the gateway of Malwa and Chambal located at Northeastern part of Malwa plateau. It lies between the latitude $23^{\circ} 53'$ North and $26^{\circ} 6'$ North and longitude $76^{\circ} 48'$ East and $78^{\circ} 16'$ East. The total area of the district is 6307.70 sq. kms. The Western boundary of the district well defined by the river Parbati. The river Parbati flows along the western boundary touching Rajgarh of Madhya Pradesh and Jhalawarh and Kota of Rajasthan. Shivpuri and Kota are located in the North whereas Vidisha, Bhopal and Rajgarh lie to the South. On 15th August 2003 the district Guna was divided into two district one being Guna itself and the other as Ashoknagar district.

4.8 Ashoknagar District:

Ashoknagar is located on the northern –eastern part of Malwa plateau between rivers Parbati and the Betwa. Mathematically the district is situated between the latitude $24^{\circ} 34'$ and longitude $77^{\circ} 43'$ E. The eastern and western boundaries of the district are well defined by the rivers. The Betwa flows along the eastern boundary separating from Sagar district and Lalitpur and Jhansi district of Uttar Pradesh. The Parbati is the main river flowing along the western boundary. Chanderi is famous for its exquisite and delicate muslin industry is a part of the district. Ashoknagar district is divided into four tehsils and has population of 68,89,920 spread over area of 4673.94 sq. kms.

Map showing various Eco-region of Madhya Pradesh

5. Methodology of survey/study: -

Several field trips were organized in various localities of Chambal eco-region during different periods of a year so as to study all kinds of vegetation appear in different seasons. These tours were arranged in a phase manner to cover different localities. The information on plants was collected. The plant material collected from the field was brought to the laboratory for preparation of herbarium, which has been deposited in Institute of Ethnobotany, Jiwaji University, Gwalior. Information on various aspects viz. local names, medicinal and other uses of plants was gathered from tribals and local inhabitants. Factors responsible for threatened status of species were also studied. For this purpose help of elderly persons of the region was sought to find out the status of species in the past and changes took place since then were asked from local people. Threat factors operating upon the vegetation were observed personally. Propagation of rare and threatened plants was made by seed germination/rhizome and stem cuttings in the medicinal plant garden of Jiwaji University, Gwalior.

PROFORMA FOR FIELD WORK

1. Place.....

2. Serial No.....

3. Informer Name

* Age.....

* Sex.....

4. Recorded by.....

5. Date.....

6. Remarks.....

7. Population.....

8. Location.....

* Name of place, Village, District, State.....

* Physical feature.....

* Facilities of camping.....

9. Environment.....

10. Area under forest.....

11. Plants Usage: -

11.1. Timber: -

11.2. Tools: -

* Tools in agriculture.....

* Utensils for cooking and eating.....

* Furniture etc.....

11.3. Food: -

* Cereals.....

* Pulses.....

* Vegetables.....

* Oils.....

* Fruits.....
* Condiments.....
11.4. Fodders.....

11.5. Plants used in medicine: -

11.6. Dyes and Tannins: -

11.7. Fuel and Light: -

11.8. Perfumes. Oils: -

11.9. Resins, Gums: -

11.10. Insecticides: -

11.11. Beverages: -

11.12. Fibers: -

6. Achievements (Report on milestones/targets identified and achieved)

Milestones / Targets identified	Milestones / Targets achieved
<ul style="list-style-type: none"> • Survey of phytodiversity of eco-region of districts of chambal region. • Identify RET and endemic species and their current status in the eco-region. • Survey of local species (8-10 prioritized) on the basis of significant economic and Socio-Religious value. • Suggest list of representative and RET and endemic species to be planted for Botanical garden 	<ul style="list-style-type: none"> • Phytodiversity of various sites of Chambal eco-region surveyed. • 35 RET taxa have been identified. • 16 species of social and economic values have been identified. • A list of 224 plant species planted in Botanical garden is given.

7. Selected localities of different districts:-

- 1) Ashok nagar:** - **1. Budhi Chanderi:** Dense dry deciduous forest. 20-25 Km. from Chanderi town on Lalitpur road, interior from the main road comes under Chanderi forest range.
- 2. Singhpur Chalda:** Dense dry deciduous forest. 3Km. away from Chanderi on Mungaoli road.
- 3. Singhpur Mahal and surrounding forest area:** Dry deciduous forest. 4 Km. away from Chanderi town on Lalitpur road, having archaeological museum.
- 4. Kati Ghati and Khandar Giri Temple:** Scattered and eroded vegetation. 1 Km. away from Chanderi town on Ramnagar road, in the vicinity of Chanderi fort.

2) Guna: -

- 1. Garha:** Dense forests (about 12 Km. from Guna town on Fatehgarh road.)
- 2. Hirapur:** Thick forest (2-4 Km. from Guna city on Bajranggarh road)

3. Umari: Disturbed forest (10-12 Km. from Guna city, there is Patai bit 2- 3 Km. away from Umari village)

4. Bajranggarh: Disturbed forest (4 Km. from Guna city, scanty Vegetation can be seen at and around the fort.)

5. Hamirpur: Dense forest (under Fatehgarh forest range), situated on the border of Rajasthan.)

6. Dhimalpura: Dense forest (under the Fatehgarh forest range, remote localities have good forest.)

7. Bamori: (forest range approx. 30 Km. away from Guna.)

8. Kedarnath: Dense forest, situated about 20-30 Km. from Umari. It contains a sacred grove around the temple of Lord shiva.

9. Gader: Dense forest (Situated on the Agra-Bombay highway approx. 6-7 Km. from Guna city.)

3) Gwalior: -

1. Gwalior fort: Dense vegetation on slopes towards north – west side A good number of cultivated plant species are also present.

2. Phool bagh: A beautiful garden with a good number of ornamental and other species

3. Italian Garden: Approximately 75 years old garden with several ornamental species. It is situated behind Motimahal building near Phoolbagh garden.

4. Gupteshwar: It lies at outskirt of Gwalior city near Agra- Bombay national highway near Gol Pahadiya. It comprises a hillock with sparse vegetation. It is also called as ‘Gol Pahadiya’. A sacred grove lies around the temple of Lord Shiva.

5. Audhpur: Scattered vegetation with predominance of Acacias (It is a site for proposed biodiversity park , lies near Jhansi road, Gwalior.)

6. Tapovan: This locality lies under forest department and comprises both cultivated & wild species. The vegetation mostly consists of Acacias. A nursery of forest department is also maintained here. It is situated near Gwalior- Jhansi road.

7. Sharda Balgram Aashram: Sparse vegetation (Lies on a hillock) situated on the out skirts of Gwalior.)

8. Barahi: Disturbed forest (Situated on Agra- Bombay highway nearly 10-12 Km. from Gwalior, also have scrubland and stone mines.)

9. Dabra: Chandpur: It is a disturbed forest locality. It is about 4 Km. away from Dabra town on Datia road. It lies near the bank of river Sindh.

10. Cancer Pahadi: Predominance of Acacias and scrubs situated on outskirts of Gwalior.

11. Pawta Barai: Thick forest (Approx.3 Km. away from Barahi range with dense forest.)

4) Morena: -

1. Piparal: Ravines (Situated on Agra- Bombay highway, approx.12 Km. from Morena town near Rajasthan border).

2. Jabrol: Ravines with eroded land comprises xerophytic vegetation, situated about 20-25 Km. from Sabalgarh tehsil)

3. Bamsoli: Mostly comprises cultivated land, lies nearly 10 Kms. from Sabalgarh. The region also comprises eroded ravines)

5) Sheopur: -

1. Kuno wildlife sanctuary: Dense forest with a large number of species (It is wild life sanctuary in Sheopur district with rich flora and fauna).

2. Karahal: Dense forest (Nearly 30 Km. from Sheopur on Pohari-Gwalior road with dense forest)

6) Shivpuri: -

1. Van Vidyalaya: Cultivated & ornamental vegetation, situated in Shivpuri, training school of forest department.)

2. Bhadaiya Kund: Possesses good vegetation (Lies on out skirts of Madhav National Park and Shivpuri.)

3. Madhav National Park: Dense forest

4. Pagara: -

Geographical position: Latitude – $25^0 18' 00''$ – $25^0 18' 55''$.

Longitude – $78^0 07' 46''$ – $78^0 09' 11''$.

Tehsil & Forest Range: Pichhor, Forest Beet: Muhar.

Nearest Village: Dhala (1 km.), which is 16 Kms. From Pichhor on Pichhor – Shivpuri road.

5. Bhamargad : -

Geographical position: Latitude – $25^0 15' 08''$ – $25^0 16' 49''$.

Longitude – $78^0 04' 12''$ – $78^0 05' 37''$.

Tehsil & Forest Range: Pichhor, Forest Beet: Muhar.

Nearest Village: Pagra, (6-8 Kms.)

6. Charkola : -

Geographical position: Latitude – $25^0 00' 25''$ – $25^0 02' 08''$.

Longitude – $78^0 01' 36''$ – $78^0 03' 38''$.

Tehsil: - Khaniyadhana. Forest Range: Pichhor,

Sub-Range: - Khaniyadhana, Forest Beet: Charkola. (9 Kms. from Khaniyadhana on Kadvaya road).

7. Gudar : -

Geographical position: Latitude – $24^0 58' 20''$ - $24^0 59' 54''$.

Longitude – $78^0 04' 39''$ – $78^0 05' 45''$.

Tehsil: - Khaniyadhana. Forest Range: Pichhor. Sub-Range: - Khaniyadhana Forest Beet: Gudar. (5 Kms. from Khaniyadhana)

8. Mamoni, Salaiya: -

Tehsil: - Karera. Forest Range: Karera. Sub-Range: - Amola Dakshin

Forest Beet: Mamoni (15 Kms. from Karera on Karera – Shivpuri road)

9. Bapavali: -

Tehsil: - Karera. Forest Range: Karera. Sub-Range: - Khod A.

Forest Beet: Bapavali.

7) Bhind: -

- 1. Barhi** – Ravines (Situated on Bhind-Itawah road, nearly 30 Km. from Bhind.)
- 2. Sapad- Samanna** – Deep ravines with thick spiny (Bhind-Itawah road few 2 Km. away from Barhi.)
- 3. Ater** - Ravines

8) Datia: -

- 1. Lala Ka tal- Pitambara peeth:** Poor vegetation. (Datia town surrounds the area, some cultivated and ornamental species also occur)

8. Phytodiversity of different localities in various districts of Chambal Region.

Districts of Chambal Eco- Region (Selected for Study):

- 1. Ashok nagar**
- 2. Guna**
- 3. Gwalior**
- 4. Morena**
- 5. Sheopur**
- 6. Shivpuri**
- 7. Bhind**
- 8. Datia**

8. 1.1: Ashok nagar District:

Locality - 1: Budhi Chanderi

Sr. No.	Botanical name Trees	Family	Local name	Uses
1	<i>Acacia leucophloea</i>	Mimosaceae	Revja	Timber
2	<i>Acacia nilotica</i>	Mimosaceae	Babool	Timber
3	<i>Aegle marmelos</i>	Rutaceae	Bel, Bel patra	Fruit yielding
4	<i>Albizia lebbek</i>	Mimosaceae	Sirish	Timber
5	<i>Albizia procera</i>	Mimosaceae	Kinai, Safed siris	Ornamental
6	<i>Anogeissus latifolia</i>	Combretaceae	Dhokda	Medicinal
7	<i>Balanites aegyptiaca</i>	Balanitaceae	Hingot	Medicinal
8	<i>Bauhinia racemosa</i>	Caesalpiniaceae	Astha	Fibre yielding
9	<i>Bombax ceiba</i>	Bombacaceae	Semal	Medicinal
10	<i>Boswellia serrata</i>	Burseraceae	Sala, Salai	Gum
11	<i>Bridelia retusa</i>	Euphorbiaceae	Karzaliya	Timber

12	<i>Buchanania lanza</i>	Anacardiaceae	Achar	Fruit yielding
13	<i>Casearia elliptica</i>	Flacourtiaceae	Chila, Kirchi	Timber yielding
14	<i>Casearia tomentosa</i>	Flacourtiaceae	Kirchi	Timber yielding
15	<i>Cassia fistula</i>	Caesalpiniaceae	Baram, Amaltas	Medicinal
16	<i>Cassine glauca</i>	Celastraceae	Jamrasi	Fuel
17	<i>Catunaregum spinosa</i>	Rubiaceae	Chamer karera	Medicinal
18	<i>Cochlospermum religiosum</i>	Cochlospermaceae	Ghanera	Medicinal
19	<i>Diospyros melanoxylon</i>	Ebenaceae	Tendu	Fruit yielding
20	<i>Ehretia laevis</i>	Boraginaceae	Datraga, Chudel	Medicinal
21	<i>Erythrina suberosa</i>	Fabaceae	Hadua chola	Medicinal
22	<i>Ficus benghalensis</i>	Moraceae	Bargad	Religious
23	<i>Ficus religiosa</i>	Moraceae	Pipal	Religious
24	<i>Ficus virens</i>	Moraceae	Pakhar	Ornamental
25	<i>Haldinia cordifolia</i>	Rubiaceae	Haldiya	Timber yielding
26	<i>Holarrhena pubescens</i>	Apocynaceae	Kurentha	Medicinal
27	<i>Holoptelea intergrifolia</i>	Ulmaceae	Chirol	Fruit yielding
28	<i>Hymenodictyon orixense</i>	Rubiaceae	Mahua kaner	Medicinal
29	<i>Kydia calycina</i>	Malvaceae	Barang	Timber yielding
30	<i>Lagerstromia parviflora</i>	Lythraceae	Karia seja	Ornamental
31	<i>Lannea coromandelica</i> <i>Madhuca longifolia</i> var. <i>latifolia</i>	Anacardiaceae	Gurjan	Timber
32	<i>Mitragyna parvifolia</i>	Sapotaceae	Mahua	Fruit yielding
33	<i>Morinda pubescens</i>	Rubiaceae	Kaim	Timber yielding
34	<i>Naringi crenulata</i>	Rubiaceae	Allua chola	Fuel
35	<i>Nyctanthes arbor-tristis</i>	Rutaceae	Naringi	Fruit yielding
36	<i>Phyllanthus emblica</i>	Oleaceae	Siyari	Basketry
37	<i>Pongamia pinnata</i>	Euphorbiaceae	Avla	Fruit yielding
38	<i>Prosopis juliflora</i>	Fabaceae	Karanj	Oil yielding
39	<i>Schleichera oleosa</i>	Mimosaceae	Prosopis	Fuel
40	<i>Soymida febrifuga</i>	Sapindaceae	Kusum	Gum,resin
41	<i>Tamarindus indica</i>	Meliaceae	Hadh Rohan	Medicinal
42	<i>Tectona grandis</i>	Caesalpiniaceae	Imli	Fruit yielding
43	<i>Terminalia alata</i>	Verbenaceae	Shagon	Timber
44	<i>Wrightia tinctoria</i> var. <i>rothii</i>	Combretaceae	Saja	Timber
45		Apocynaceae	Indrajav	Medicinal

Shrubs

1	<i>Acacia caesia</i>	Mimosaceae	Aerma	
2	<i>Dendrocalamus strictus</i>	Poaceae	Bans	Timber
3	<i>Dendropthe falcata</i>	Loranthaceae	Banda	
4	<i>Euphorbia nivulia</i>	Euphorbiaceae	Thuar	Medicinal

5	<i>Flacourzia indica</i>	Flacourtiaceae	Kaker	Timber
6	<i>Helicteres isora</i>	Sterculiaceae	Maror phali	Medicinal
7	<i>Ipomoea carnea</i>	Convolvulaceae	Beshram	
8	<i>Maytenus emarginata</i>	Celastraceae	Baekal	Fruit yielding
9	<i>Mimosa himalayana</i>	Mimosaceae	Aar	
10	<i>Opuntia elatior</i>	Cactaceae	Nagphani	Ornamental
11	<i>Ziziphus nummularia</i>	Rhamnaceae	Jher beri	Fruit yielding
12	<i>Ziziphus oenoplia</i>	Rhamnaceae	Makoi	Fruit yielding

Herbs

1	<i>Abutilon hirtum</i>	Malvaceae	Barkanghi	Medicinal
2	<i>Acanthospermum hispidum</i>	Asteraceae		
	<i>Achyranthes aspera var.</i>			
3	<i>argentea</i>	Amaranthaceae	Chirchita	Medicinal
4	<i>Aeschynomene indica</i>	Fabaceae	Antwa, Didhan	Medicinal
5	<i>Amaranthus viridis</i>	Amaranthaceae	Chaulai	Vegetable
6	<i>Argemone mexicana</i>	Papaveraceae	Pili Kateri	Medicinal
7	<i>Atylosia scarabaeoides</i>	Fabaceae	Bankulthi	Medicinal
8	<i>Avena sativa</i>	Poaceae	Jav	Cultivated

Locality - 4: Kati Ghati & Khandar Giri Temple (Chanderi)

Sr. No.	Botanical name	Family	Local name	Uses
Trees				
1	<i>Acacia nilotica</i>	Mimosaceae	Babool	Timber yielding
2	<i>Aegle marmelos</i>	Rutaceae	Bel, Belpatra	Fruit yielding
3	<i>Albizia lebbek</i>	Mimosaceae	Shirish	Timber yielding
4	<i>Albizia odoratissima</i>	Mimosaceae	Kala siris	Timber yielding
5	<i>Allangium salvifolium</i>	Cornaceae	Ankol	Medicinal
6	<i>Annona squamosa</i>	Annonaceae	Sitaphal	Fruit yielding
7	<i>Azadirachta indica</i>	Meliaceae	Neem	Medicinal
8	<i>Bombax ceiba</i>	Bombacaceae	Semal	Medicinal
9	<i>Butea monosperma</i>	Fabaceae	Palash, Chola	Dye yielding
10	<i>Cassia fistula</i>	Caesalpiniaceae	Barram, Amaltas	Medicinal
11	<i>Cassia siamea</i>	Caesalpiniaceae	Kasood	Ornamental
12	<i>Dalbergia sisoo</i>	Fabaceae	Sisam	Timber yielding

13	<i>Delonix regia</i>	Caesalpiniaceae	Gulmohar	Ornamental
14	<i>Diospyros melanoxylon</i>	Ebenaceae	Tendu	Timber yielding
15	<i>Ehretia laevis</i>	Boraginaceae	Datraga	Medicinal
16	<i>Ficus anottiana</i>	Moraceae		
17	<i>Gardenia latifolia</i>	Rubiaceae	Safedpanpra	Medicinal
18	<i>Holarrhena pubescens</i>	Apocynaceae	Kurentha	Medicinal
19	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol	Fruit yielding
20	<i>Lagerstromia parviflora</i>	Lythraceae	Karia seja	Gum,resin
21	<i>Lannea coromandelica</i> <i>Madhuca longifolia</i> var. <i>latifolia</i>	Anacardiaceae	Gurjan	Timber yielding
22	<i>Mangifera indica</i>	Sapotaceae	Mahua	Oil yielding
23	<i>Manilkara hexandra</i>	Anacardiaceae	Aam	Fruit yielding
24	<i>Milliusa tomentosa</i>	Sapotaceae	Khirni	Fruit yielding
25	<i>Phoenix sylvestris</i>	Annonaceae	Kari	Timber yielding
26	<i>Pongamia pinnata</i>	Arecaceae	Khajuri	Fruit yielding
27	<i>Ricinus communis</i>	Fabaceae	Karanj	Oil yielding
28	<i>Sterculia urens</i>	Euphorbiaceae	Arand	Oil yielding
29	<i>Ziziphus mauritiana</i>	Sterculiaceae	Kullu, Karer	Gum, resin
30		Rhamnaceae	Ber	Fruit yielding

Shrubs

1	<i>Adathoda zeylanica</i>	Acanthaceae	Arusa	Medicinal
2	<i>Caesalpinia bonduc</i>	Caesalpiniaceae	Gataran	Medicinal
3	<i>Calotropis procera</i>	Asclepiadaceae	Madar	Medicinal
4	<i>Capparis sepiaria</i>	Capparaceae	Hins	Fruit yielding
5	<i>Capparis zeylanica</i>	Capparaceae	Ardanda	Medicinal
6	<i>Datura innoxia</i>	Solanaceae	Datura	Medicinal
7	<i>Ipomea carnea</i>	Convolvulaceae	Beshram	
8	<i>Jatropha gossypifolia</i>	Euphorbiaceae	Kosoronda, Lalbherenda	
9	<i>Phyllanthus reticulatus</i>	Euphorbiaceae		
10	<i>Woodfordia fruticosa</i>	Lythraceae	Dhao	Medicinal
11	<i>Ziziphus oenoplia</i>	Rhamnaceae	Makoi	Fruit yielding

Herbs

1	<i>Achyranthes aspera</i> var <i>argentea</i>	Amaranthaceae	Chirchita	Medicinal
2	<i>Aerva lanata</i>	Amaranthaceae		
3	<i>Ageratum conyzoides</i>	Asteraceae		
4	<i>Aloe vera</i>	Liliaceae	Gwarpatha	Medicinal
5	<i>Amaranthus spinosus</i>	Amaranthaceae	Kateli chaulai

Locality - 8:Kedarnath

Sr. No.	Botanical name	Family	Local name	Uses
Trees				
1	<i>Acacia catechu</i>	Mimosaceae	Khair, Katha	Timber yielding
2	<i>Acacia nilotica</i>	Mimosaceae	Babool	Timber yielding
3	<i>Aegle marmelos</i>	Rutaceae	Bel, Bel patra	Fruit yielding
4	<i>Albizia odoratissima</i>	Mimosaceae	Kala siris	Timber yielding
5	<i>Anogessius latifolia</i>	Combretaceae	Dhonkda	Gum, resin
6	<i>Anogessius pendula</i>	Combretaceae	Kardai	Timber yielding
7	<i>Anthocephalus chinensis</i>	Rubiaceae	Kadam	Ornamental
8	<i>Azadirachta indica</i>	Meliaceae	Neem	Medicinal
9	<i>Bauhinia racemosa</i>	Caesalpiniaceae	Astro	Fibre yielding
10	<i>Bombax ceiba</i>	Bombacaceae	Semal	Medicinal
11	<i>Boswellia serrata</i>	Burseraceae	Sala, Salai	Gum, resin
12	<i>Bridelia retusa</i>	Euphorbiaceae	Karjalia	Timber yielding
13	<i>Buchnania lanza</i>	Anacardiaceae	Achar	Fruit yielding
14	<i>Butea monosperma</i>	Fabaceae	Palash, chola	Dye yielding
15	<i>Caseria elliptica</i>	Flacourtiaceae	Chilon	Fuel
16	<i>Cassia fistula</i>	Caesalpiniaceae	Barram, Amaltas	Medicinal
17	<i>Cassine glauca</i>	Celastraceae	Jamrasi	Timber yielding
18	<i>Catunaregam spinosa</i>	Rubiaceae	Chamer karera	Medicinal
19	<i>Cochlospermum religiosum</i>	Cochlospermaceae	Ghanera	Medicinal
20	<i>Cordia dichotoma</i>	Boraginaceae	Lasora	Fruit yielding
21	<i>Dalbergia sisoo</i>	Fabaceae	Sisam	Timber yielding
22	<i>Diospyros melanoxylon</i>	Ebenaceae	Tendu	Timber yielding
23	<i>Ehretia laevis</i>	Boraginaceae	Pharedu	Medicinal
24	<i>Erythrina suberosa</i>	Fabaceae	Adua chola	Medicinal
25	<i>Ficus benghalensis</i>	Moraceae	Bargad	Religious
26	<i>Ficus racemosa</i>	Moraceae	Gular	Fruit yielding
27	<i>Ficus religiosa</i>	Moraceae	Pipal	Religious
28	<i>Ficus retusa</i>	Moraceae	Paras pipal	Ornamental
29	<i>Ficus virens</i>	Moraceae	Pakar	Medicinal
30	<i>Flacourzia indica</i>	Flacourtiaceae	Kaker	Timber yielding
31	<i>Gardenia resinifolia</i>	Rubiaceae	Dikamali	Medicinal
32	<i>Grewia tiliifolia</i>	Tiliaceae	Dhaman	Fruit yielding
33	<i>Haldinia cordifolia</i>	Rubiaceae	Haldiya, Haldu	Timber yielding
34	<i>Holarrhena pubescens</i>	Apocynaceae	Kuletha, Dudhi	Medicinal
35	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol	Medicinal

36	<i>Hymenodictyon orixense</i>	Rubiaceae	Mahua kaner	Medicinal
37	<i>Kydia calycina</i>	Malvaceae	Dhamon	Medicinal
38	<i>Lagerstromia parviflora</i>	Lythraceae	Karia seja	Gum, resin
39	<i>Lannea coromandelica</i>	Anacardiaceae	Gurjan	Timber yielding
40	<i>Leucaena leucocephala</i>	Mimosaceae	Subabul	Timber yielding
41	<i>Litsea glutinosa</i>	Lauraceae	Maida lakri	Timber yielding
	<i>Madhuca longifolia</i> var. <i>latifolia</i>	Sapotaceae	Mahua	Oil yielding
42	<i>Mallotus philippensis</i>	Euphorbiaceae	Kumkum	Dye yielding
44	<i>Mangifera indica</i>	Anacardiaceae	Aam	Fruit yielding
45	<i>Milliusa tomentosa</i>	Annonaceae	Kari	Timber yielding
46	<i>Mitragyna parvifolia</i>	Rubiaceae	Kam	Timber yielding
47	<i>Nyctanthes arbor-tristis</i>	Oleaceae	Siyari	Basketry
48	<i>Prosopis juliflora</i>	Mimosaceae	Vilayti babool	Fuel
49	<i>Schleichera oleosa</i>	Sapindaceae	Kusum	Gum,resin
50	<i>Sterculia urens</i>	Sterculiaceae	Kullu, Karer	Gum,resin
51	<i>Syzygium cumini</i>	Myrtaceae	amun	Fruit yielding
52	<i>Terminalia alata</i>	Combretaceae	Saja	Timber yielding
53	<i>Terminalia arjuna</i>	Combretaceae	Arjun	Medicinal
54	<i>Terminalia bellirica</i>	Combretaceae	Bahera	Medicinal
55	<i>Thespesia populnea</i>	Malvaceae	Paras pipal	Ornamental
56	<i>Ziziphus mauritiana</i>	Rhamnaceae	Ber	Fruit yielding

Shrubs

1	<i>Caesalpinia bonduc</i>	Caesalpiniaceae	Gataran	Medicinal
2	<i>Capparis zeylanica</i>	Capparaceae	Ardanda	Medicinal
3	<i>Carissa carandas</i>	Apocynaceae	Karonda	Fruit yielding
4	<i>Datura innoxia</i>	Solanaceae	Datura	Medicinal
5	<i>Datura metel</i>	Solanaceae	Kala datura	Medicinal
6	<i>Dendrocalamus strictus</i>	Poaceae	Bans	Timber yielding
7	<i>Dendropthe falcata</i>	Loranthaceae	Banda	
8	<i>Euphorbia nivulia</i>	Euphorbiaceae	Thuar	Medicinal
9	<i>Helicteres isora</i>	Sterculiaceae	Maror phali	Medicinal
10	<i>Ipomea carnea</i>	Convolvulaceae	Beshram	
11	<i>Lantana camara</i>	Verbenaceae	Raimuniya	Ornamental
12	<i>Mimosa himalayana</i>	Mimosaceae	Aar	
13	<i>Musa paradisiaca</i>	Musaceae	Kela	Fruit yielding
14	<i>Nerium indicum</i>	Apocynaceae	Kaner	Ornamental
15	<i>Securinega leucopyrus</i>	Euphorbiaceae	Hartho	Medicinal
16	<i>Syzygium heyneanum</i>	Myrtaceae		
17	<i>Woodfordia fruticosa</i>	Lythraceae	Dhao	Medicinal

18	<i>Ziziphus oenoplia</i>	Rhamnaceae	Makoi	Fruit yielding
19	<i>Ziziphus xylopyrus</i>	Rhamnaceae	Ghont	Medicinal

Herb

1	<i>Acanthospermum hispidum</i>	Asteraceae		
	<i>Achyranthes aspera ver</i>			
2	<i>argentea</i>	Amaranthaceae	Chirchita	Medicinal
3	<i>Aerva sabgyubikebta</i>	Amaranthaceae		
4	<i>Aeschynomene indica</i>	Fabaceae	Sola	Medicinal
5	<i>Ammania multiflora</i>	Lythraceae	Dadmari	Medicinal
6	<i>Anisomeles indica</i>	Lamiaceae		
7	<i>Argemone mexicana</i>	Papaveraceae	Pili kateli	Medicinal
8	<i>Bidens biternata</i>	Asteraceae		
9	<i>Blepharis asperima</i>	Acanthaceae		
10	<i>Buddleja asiatica</i>	Buddlejaceae	Neemda	Vegetable
11	<i>Cassia absus</i>	Caesalpiniaceae	Chaksu	Medicinal
12	<i>Cassia kleinii</i>	Caesalpiniaceae		
13	<i>Cassia tora</i>	Caesalpiniaceae	Pumar	Medicinal
14	<i>Cassia uniflora</i>	Caesalpiniaceae		Ornamental
15	<i>Chlorophytum tuberosum</i>	Liliaceae	Kat musli	Medicinal
16	<i>Cleome viscosa</i>	Cleomaceae	Hulhul	Medicinal
17	<i>Commelina hasskarlii</i>	Commelinaceae		
18	<i>Crotalaria juncea</i>	Fabaceae	San	Fibre yielding
19	<i>Curculigo orchoides</i>	Hypoxidaceae	Kali musli	Medicinal
20	<i>Curcuma pseudomontana</i>	Zingiberaceae	Jungli Haldi	Medicinal
21	<i>Cyathoclase purpurea</i>	Asteraceae		
22	<i>Datura innoxia</i>	Solanaceae	Datura	Medicinal
23	<i>Desmodium gangeticum</i>	Fabaceae	Sarivan	Medicinal
24	<i>Desmodium triflorum</i>	Fabaceae		Medicinal
25	<i>Eclipta erecta</i>	Asteraceae	Bringraj	Oil yielding
26	<i>Elytraria acaulis</i>	Acanthaceae		Medicinal
27	<i>Eranthemum roseum</i>	Acanthaceae		
28	<i>Euphorbia hirta</i>	Euphorbiaceae	Dudhi	Medicinal
29	<i>Euphorbia thymifolia</i>	Euphorbiaceae	Dudhi	Medicinal
30	<i>Evolvulus alsinoides</i>	Convolvulaceae	Shankhavali	Medicinal
31	<i>Flemingia strobilifera</i>	Fabaceae	Chipti kusrunt	Medicinal
32	<i>Gomphrena celosioides</i>	Amaranthaceae		
33	<i>Haplanthodes tentaculatus</i>	Acanthaceae		
34	<i>Hibiscus lobatus</i>	Malvaceae		
35	<i>Hyptis suaveolens</i>	Lamiaceae	Ban tulsi	Medicinal
36	<i>Indigofera astragalina</i>	Fabaceae		

37	<i>Indigofera cordifolia</i>	Fabaceae	Nilawari	Medicinal
38	<i>Indigofera linifolia</i>	Fabaceae	Torki	Medicinal
39	<i>Indigofera linnaei</i>	Fabaceae	Bhuinguli, Atahai	Medicinal
40	<i>Justicia diffusa</i>	Acanthaceae		
41	<i>Kickxia ramosissima</i>	Scrophulariaceae		
42	<i>Lagescea mollis</i>	Asteraceae		
43	<i>Leucas aspera</i>	Lamiaceae	Bhodaki	Medicinal
44	<i>Leucas cephalotus</i>	Lamiaceae	Dhurpisag	Medicinal
45	<i>Limnophilla heterophylla</i>	Scrophulariaceae		
46	<i>Lindenbergia indica</i>	Scrophulariaceae		
47	<i>Lindernia ciliata</i>	Acanthaceae		
48	<i>Lindernia crustacea</i>	Acanthaceae		
49	<i>Melochia corchorifolia</i>	Sterculiaceae		
50	<i>Oldenlandia corymbosa</i>	Rubiaceae		Medicinal
51	<i>Peristrophe paniculata</i>	Acanthaceae	Atrilal	Medicinal
52	<i>Phyllanthus virgatus</i>	Euphorbiaceae		
53	<i>Physalis minima</i>	Solanaceae	Chirpota	Medicinal
54	<i>Pogostemon benghalense</i>	Lamiaceae		Medicinal
55	<i>Pupalia lappacea</i>	Amaranthaceae	Chit chita	
56	<i>Rungia pectinata</i>	Acanthaceae		
57	<i>Scilla hyacinthina</i>	Liliaceae		
58	<i>Sida acuta</i>	Malvaceae	Mahabala	Medicinal
59	<i>Sida alba</i>	Malvaceae		
60	<i>Sida cordata</i>	Malvaceae		
61	<i>Sida cordifolia</i>	Malvaceae	Bala Barhanta, Bhat- kateri,	Medicinal
62	<i>Solanum violaceum</i>	Solanaceae	Bhatkattaiya	Medicinal
63	<i>Solanum virginianum</i>	Solanaceae		
64	<i>Sonchus asper</i>	Asteraceae		
65	<i>Spaeranthus indicus</i>	Asteraceae	Gorakh mundi	Medicinal
66	<i>Spermacoce hispida</i>	Rubiaceae		
67	<i>Spermacoce pusilla</i>	Rubiaceae		
68	<i>Tephrosia tinctoria</i>	Fabaceae	Surpunkha	Medicinal
69	<i>Tridax procumbens</i>	Asteraceae	Ghamra	Medicinal
70	<i>Triumfetta pentandra</i>	Tiliaceae		
71	<i>Triumfetta rotundifolia</i>	Tiliaceae		
72	<i>Urginea indica</i>	Liliaceae	Jangli piyaz	Medicinal
73	<i>Vernonia cinerea</i>	Asteraceae	Sahdevi	Medicinal
74	<i>Waltheria indica</i>	Sterculiaceae		
75	<i>Xanthium indicum</i>	Asteraceae	Bada gokharu	Medicinal

Climbers

1	<i>Abrus precatorius</i>	Fabaceae	Gumchi, Gunj	Medicinal
2	<i>Ampelocissus latifolia</i>	Vitaceae	Gudbel	Medicinal
3	<i>Asparagus recemosus</i> <i>Cardiospermum helicacabum</i>	Liliaceae	Satavar	Medicinal
5	<i>Cayratia trifolia</i>	Sapindaceae	Kanphuta	Medicinal
6	<i>Celastrus paniculatus</i>	Vitaceae	Tipani	Medicinal
7	<i>Cissampelos pareira</i>	Celastraceae	Malkamini	Medicinal
8	<i>Coccus hirsutus</i>	Menispermaceae	Pahadi jad	Medicinal
9	<i>Dioscorea bulbifera</i>	Menispermaceae	Jamtkibel	Medicinal
10	<i>Hemidesmus indicus</i>	Dioscoreaceae	Ban boor	Medicinal
11	<i>Ichnocarpus frutescens</i>	Asclepiadaceae	Anantmul	Medicinal
12	<i>Ipomoea eriocarpa</i>	Apocynaceae	Dhimarbel	Medicinal
13	<i>Ipomoea nil</i>	Convolvulaceae	Kaladana, Mirchai	Ornamental
14	<i>Ipomoea quamoclit</i>	Convolvulaceae	Agarbel, Kauj,	
15	<i>Milletia extensa</i>	Fabaceae	Patani	Medicinal
16	<i>Momordica dioica</i>	Cucurbitaceae	Kakora	Vegetable
17	<i>Mucuna pruriens</i>	Fabaceae	Kewanch	Medicinal
18	<i>Passiflora foetida</i>	Passifloraceae		
19	<i>Pergularia daemia</i>	Asclepiadaceae	Sadowani	Medicinal

Grasses

1	<i>Acrachne racemosa</i>	Poaceae

16	<i>Mangifera indica</i>	Sapotaceae	Medicinal
17	<i>Mimusops elengii</i>	Anacardiaceae	Fruit yielding
18	<i>Morinda pubescens</i>	Sapotaceae	Ornamental
19	<i>Nyctanthes arbor-tristis</i>	Rubiaceae	Medicinal
20	<i>Peltophorum pterocarpum</i>	Oleaceae	Dye yielding
21	<i>Phoenix sylvestris</i>	Caesalpiniaceae	Ornamental
22	<i>Phyllanthus emblica</i>	Arecaceae	Fruit yielding
23	<i>Polyalthia longifolia</i>	Euphorbiacea	Medicinal
24	<i>Pterospermum acerifolium</i>	Annonaceae	Ornamental
25	<i>Punica granatum</i>	Sterculiaceae	Ornamental
26	<i>Roystonea regia</i>	Punicaceae	Fruit yielding
27	<i>Syzygium cumini</i>	Arecaceae	Ornamental
28	<i>Tamarindus indica</i>	Myrtaceae	Fruit yielding
29		Caesalpiniaceae	Fruit yielding

Shrubs

1	<i>Artobotrys hexapetalus</i>	Annonaceae	Harachampa	Ornamental
2	<i>Capparis sepiaria</i>	Capparaceae	Hins	
3	<i>Carissa opaca</i>	Apocynaceae	Karonda	Fruit yielding
4	<i>Cordyline terminalis</i>	Liliaceae		Ornamental
5	<i>Cycas revoluta</i>	Cycadaceae	Cycas	Ornamental
6	<i>Duranta repens</i>	Verbenaceae		Ornamental
7	<i>Hibiscus rosa-sinensis</i>	Malvaceae	Gudhal	Medicinal
8	<i>Jatropha integerrima</i>	Euphorbiaceae		Ornamental
9	<i>Lagerstroemia indica</i>	Lythraceae		Ornamental
10	<i>Lantana camara</i>	Verbenaceae	Raimuniya	Ornamental
11	<i>Murraya paniculata</i>	Rutaceae	Kamini	Ornamental
12	<i>Mussaenda frondosa</i>	Rubiaceae	Sarved	Ornamental
13	<i>Pentas lanceolata</i>	Rubiaceae		Ornamental
14	<i>Ricinus communis</i>	Euphorbiaceae	Arand	Oil yielding
15	<i>Tabernaemontana divaricata</i>	Apocynaceae	Chandani	Ornamental
16	<i>Tecoma stans</i>	Bignoniaceae		Ornamental
17	<i>Thuja orientalis</i>	Cycadaceae	Thuja	Ornamental

Herbs

1	<i>Acalypha indica</i>	Euphorbiaceae	Kuppi	Medicinal
2	<i>Amaranthus viridis</i>	Amaranthaceae	Chaulai	Vegetable
3	<i>Aster amellus</i>	Asteraceae	Aster	Ornamental
4	<i>Boerhaavia diffusa</i>	Nyctaginaceae	Punarnava	Medicinal

5	<i>Cassia tora</i>	Caesalpiniaceae	Pumar	Vegetable
6	<i>Catharanthus roseus</i>	Apocynaceae	Sadabahar	Medicinal
7	<i>Chrysanthemum americanum</i>	Asteraceae	Shevanti	Ornamental
8	<i>Chrysanthemum indicum</i>	Asteraceae	Shevanti	Ornamental
9	<i>Crinum asiaticum</i>	Amaryllidiaceae		Ornamental
10	<i>Crossandra infundibuliformis</i>	Acanthaceae	Priyadarsa	Ornamental
11	<i>Dracaena elliptica</i>	Agavaceae		Ornamental
12	<i>Eclipta prostrata</i>	Euphorbiaceae	Bhringraj	Medicinal
13	<i>Euphorbia hirta</i>	Euphorbiaceae	Dudhi	Medicinal
14	<i>Euphorbia thymifolia</i>	Euphorbiaceae	Dudhi	Medicinal
15	<i>Impatiens balsamina</i>	Balsaminaceae	Guldawdi	Ornamental
16	<i>Muehlenbeckia platyclada</i>	Polygonaceae	Jungli tambakoo	Ornamental
17	<i>Nicotiana plumbaginifolia</i>	Solanaceae		
18	<i>Oxalis corymbosa</i>	Oxalidaceae		Medicinal
19	<i>Parthenium hysterophorus</i>	Asteraceae	Gajar ghas	
20	<i>Phlox divaricata</i>	Polemoniaceae	Phlox	Ornamental
21	<i>Phyllanthus amarus</i>	Euphorbiaceae	Jaramala	Medicinal
22	<i>Portulaca oleracea</i>	Portulacaceae	Gol bhaji	Vegetable
23	<i>Salvia officinalis</i>	Lamiaceae		Ornamental
24	<i>Sansevieria zeylanica</i>	Euphorbiaceae		Ornamental
25	<i>Sida rhombifolia</i>	Malvaceae	Atibala	Medicinal
26	<i>Solanum virginianum</i>	Solanaceae	Bhatkattaiya	Medicinal
27	<i>Tridax procumbens</i>	Asteraceae	Ghamra	Medicinal
28	<i>Zephyranthes flava</i>	Amaryllidaceae		Ornamental

Climbers

1	<i>Coccinia grandis</i>	Cucurbitaceae	Kundru	Vegetable

Locality - 10: Cancer pahadi

Sr. No.	Botanical name Trees	Family	Local name	Uses
1	<i>Acacia catechu</i>	Mimosaceae	Khair	Timber
2	<i>Acacia leucophloea</i>	Mimosaceae	Revja	Fuel
3	<i>Acacia nilotica</i>	Mimosaceae	Babool	Timber
4	<i>Ailanthus excelsa</i>	Simaroubaceae	Maharuk	Fuel
5	<i>Albizia lebbek</i>	Mimosaceae	Sirish	Ornamental
6	<i>Annona squamosa</i>	Annonaceae	Sitaphal	Fruit yielding
7	<i>Anogeissus pendula</i>	Combretaceae	Kardai	Timber
8	<i>Artocarpus integrifolia</i>	Moraceae	Kathal	Fruit yielding
9	<i>Azadirachta indica</i>	Meliaceae	Neem	Medicinal
10	<i>Bauhinia racemosa</i>	Caesalpiniaceae	Astha	Fibre yielding
11	<i>Bauhinia variegata</i>	Caesalpiniaceae	Kachnar	Ornamental
12	<i>Bombax ceiba</i>	Bombacaceae	Semal	Medicinal
13	<i>Butea monosperma</i>	Fabaceae	Palash	Medicinal
14	<i>Callistemon lanceolatus</i>	Myrtaceae	Bottle brush	Ornamental
15	<i>Cassia fistula</i>	Caesalpiniaceae	Amaltas	Medicinal
16	<i>Cassia siamea</i>	Caesalpiniaceae	Kasood	Ornamental
17	<i>Citrus aurantifolia</i>	Rutaceae	Nimbu	Fruit yielding
18	<i>Dalbergia sisoo</i>	Fabaceae	Sisam	Timber
19	<i>Delonix regia</i>	Caesalpiniaceae	Gulmohar	Ornamental
20	<i>Dolichandrone falcata</i>	Bignoniaceae		Medicinal
21	<i>Eucalyptus umbellata</i>	Myrtaceae	Nilgiri	Oil yielding
22	<i>Fefonia limonia</i>	Rutaceae	Kaitha	Fruit yielding
23	<i>Ficus benghalensis</i>	Moraceae	Bargad	Religious
24	<i>Ficus racemosa</i>	Moraceae	Gular	Religious
25	<i>Ficus religiosa</i>	Moraceae	Peepal	Religious
26	<i>Flacourtie indica</i>	Flacourtiaceae	Kakher	Fuel
27	<i>Gmelina arborea</i>	Verbenaceae	Gambhari,Khamer	Ornamental
28	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol	Fruit yielding
29	<i>Jacaranda mimosaeifolia</i>	Bignoniaceae	Nila gulmohar	Ornamental
30	<i>Leucaena leucocephala</i>	Mimosaceae	Subabool	Fuel
31	<i>Livistona chinensis</i>	Arecaceae	Fan palm	Ornamental
32	<i>Mangifera indica</i>	Anacardiaceae	Aam	Fruit yielding
33	<i>Millingtonia hortensis</i>	Bignoniaceae	Akash neem	Ornamental
34	<i>Mimusops elengi</i>	Sapotaceae	Molshri	Ornamental
35	<i>Mitragyna parvifolia</i>	Rubiaceae	Kem	Ornamental
36	<i>Moringa oleifera</i>	Moringaceae	Shejan	Fruit yielding
37	<i>Morus alba</i>	Moraceae	Sehtut	Fruit yielding

38	<i>Murraya paniculata</i>	Rutaceae	Kamini	Medicinal
39	<i>Nerium indicum</i>	Apocynaceae	Kaner	Ornamental
40	<i>Nyctanthes arbor-tristis</i>	Oleaceae	Siyari	Dye yielding
41	<i>Parkinsonia aculeata</i>	Caesalpiniaceae	Bilayati babool	Ornamental
42	<i>Peltophorum pterocarpum</i>	Caesalpiniaceae	Copper pod	Ornamental
43	<i>Pheonix sylvestris</i>	Arecaceae	Khajuri	Fruit yielding
44	<i>Phyllanthus emblica</i>	Euphorbiaceae	Avla	Fruit yielding
45	<i>Pithecelobium dulce</i>	Caesalpiniaceae	Jungle jalebi	Fruit yielding
46	<i>Polyalthia longifolia</i>	Annonaceae	Ashok	Ornamental
47	<i>Pongamia pinnata</i>	Fabaceae	Karanj	Oil yielding
48	<i>Prosopis juliflora</i>	Mimosaceae	Vilayati babool	Fuel
49	<i>Psidium guajava</i>	Myrtaceae	Amrud	Fruit yielding
50	<i>Roystonea regia</i>	Arecaceae	Bottle palm	Ornamental
51	<i>Syzygium cumini</i> <i>Wrightia tinctoria var.</i>	Myrtaceae	Jamun	Fruit yielding
52	<i>tinctoria</i>	Apocynaceae	Indrajav	Medicinal
53	<i>Ziziphus mauritiana</i>	Rhamnaceae	Ber	Fruit yielding

Shrubs

1	<i>Abutilon indicum</i>	Malvaceae	Kanghi	Medicinal
2	<i>Bougainvillea glabra</i>	Nyctaginaceae	Boganelia	Ornamental
3	<i>Calotropis gigantea</i>	Asclepiadaceae	Akauwa	Medicinal
4	<i>Calotropis procera</i>	Asclepiadaceae	Akauwa	Medicinal
5	<i>Capparis sepiaria</i>	Capparaceae	Hins	
6	<i>Carica papaya</i>	Caricaceae	Papai	Fruit yielding
7	<i>Carissa opaca</i>	Apocynaceae	Karondi	Fruit yielding
8	<i>Clerodendrum inerme</i>	Verbenaceae	Vialayti mahandi	Ornamental
9	<i>Clerodendrum multiflorum</i>	Verbenaceae	Inni	
10	<i>Dichrostachys cinerea</i>	Mimosaceae	Bilatri	Fuel
11	<i>Gmelina philippensis</i>	Verbenaceae		Ornamental

8. 5.2. Threatened Plant Species of Various Localities of Sheopur Kalan district.

Locality - Kuno Wildlife Sanctuary

Sr. No.	Name of Plant	Family	Local Name
1	<i>Abrus precatorius</i>	Fabaceae	Ratti
2	<i>Helicteres isora</i>	Sterculiaceae	Maror phalli
3	<i>Mucuna pruriens</i>	Fabaceae	Kewanch
4	<i>Plumbago zeylanica</i>	Plumbaginaceae	Chitawar
5	<i>Prosopis cineraria</i>	Mimosaceae	Chenkur
6	<i>Tinospora cordifolia</i>	Menispermaceae	Giloy

Locality - Karahal

Sr. No.	Name of Plant	Family	Local Name
1	<i>Aristolochia indica</i>	Aristolochiaceae	
2	<i>Helicteres isora</i>	Sterculiaceae	Maror phalli
3	<i>Pterocarpus marsupium</i>	Fabaceae	Bijasal
4	<i>Tinospora cordifolia</i>	Menispermaceae	Giloy

8. 6.1: Shivpuri District:

Shivpuri is situated at: 25°20" North Latitudes & 77°15" East Longitude

Height from sea level: 521.5 mts. Annual Rainfall: 900 mm

Annual average Temperature: 23.4° C

Daily Temperature: Max- 33° C & Min. - 14.01° C

Locality - 1:Surrounding of Van-Vidyalaya

Sr. No.	Botanical name	Family	Local name	Uses

9.6: Shivpuri district

Sr. No.	Botanical Name Medicinal	Family	Local Name
1	<i>Abelmoschus ficulneus</i>	Malvaceae	Jangli bhindi
2	<i>Abrus precatorius</i>	Fabaceae	Gumchi, Ratti
3	<i>Abutilon hirtum</i>	Malvaceae	Barkanghi
4	<i>Abutilon indicum</i>	Malvaceae	Kanghi, Mudra
5	<i>Acanthospermum hispidum</i>	Asteraceae	
6	<i>Achyranthes aspera</i>	Amaranthaceae	Latjira
7	<i>Achyranthes aspera var argentea</i>	Amaranthaceae	Chirchita
8	<i>Adathoda zeylanica</i>	Acanthaceae	Adulasa
9	<i>Alangium salvifolium</i>	Cornaceae	Ankol
10	<i>Alternanthera pungens</i>	Amaranthaceae	Guroosag
11	<i>Ampleocissus latifolia</i>	Vitaceae	Panibel
12	<i>Anogeissus latifolia</i>	Combretaceae	Dhawda
13	<i>Argemone mexicana</i>	Papaveraceae	Pili kateri
14	<i>Argyreia nervosa</i>	Covolvulaceae	Samadar ka Pat
15	<i>Aristolochia bracteolata</i>	Aristolochiaceae	Kidamar
16	<i>Aristolochia indica</i>	Aristolochiaceae	Gunisar
17	<i>Asparagus racemosus</i>	Liliaceae	Satavar
18	<i>Atylosia scarabaeoides</i>	Fabaceae	Bankulthi
19	<i>Azadirachta indica</i>	Meliaceae	Neem
20	<i>Bacopa monnieri</i>	Scrophulariaceae	Brahmi
21	<i>Barleria prionitis</i>	Acanthaceae	Pia bans
22	<i>Bidens biternata</i>	Asteraceae	
23	<i>Biophytum sensitivum</i>	Oxalidaceae	
24	<i>Boerhaavia diffusa</i>	Nyctaginaceae	Punarnava

25	<i>Bombax ceiba</i>	Bombacaceae	Semal
26	<i>Boswellia serrata</i>	Burseraceae	Salai
27	<i>Calotropis gigantea</i>	Asclepiadaceae	Safed Akauwa
28	<i>Calotropis procera</i>	Asclepiadaceae	Akauwa
29	<i>Cardiospermum helicacabum</i>	Sapindaceae	Kanphuta
30	<i>Cascuta reflexa</i>	Casutaceae	Amarbel
31	<i>Cassia absus</i>	Caesalpiniaceae	Chaksu
32	<i>Cassia fistula</i>	Caesalpiniaceae	Amaltas
33	<i>Cassia kleinii</i>	Caesalpiniaceae	
34	<i>Cassia occidentalis</i>	Caesalpiniaceae	Ban-chironta, Bara chakora

106	<i>Melhania hamiltonia</i>	Sterculiaceae	
107	<i>Merremia emarginata</i>	Convolvulaceae	Manduk Parni
108	<i>Milletia extensa</i>	Fabaceae	Agarbel, Kauj, Patani
109	<i>Milliusa tomentosa</i>	Annonaceae	
110	<i>Mimosa pudica</i>	Mimosaceae	Chuimui
111	<i>Mitragyna parvifolia</i>	Rubiaceae	Kem
112	<i>Mucuna pruriens</i>	Fabaceae	Kewanch
113	<i>Nymphaoides indica</i>	Menyanthaceae	Barachuli
114	<i>Ocimum basilicum</i>	Lamiaceae	Bantulsi, Ramtulsi
115	<i>Ocimum canum</i>	Lamiaceae	Ran tulsi
116	<i>Ocimum tenuiflorum</i>	Lamiaceae	Tulsi
117	<i>Oldenlandia corymbosa</i>	Rubiaceae	Dhaman-paper
118	<i>Oxalis corniculata</i>	Oxalidaceae	Khatua
119	<i>Pergularia daemia</i>	Asclepiadaceae	Sadowani
120	<i>Perostrophe paniculata</i>	Acanthaceae	Kakjanga
121	<i>Phyllanthus amarus</i>	Euphorbiaceae	Bhuianwala
122	<i>Phyllanthus emblica</i>	Euphorbiaceae	Anwala
123	<i>Physalis minima</i>	Solanaceae	Poptya
124	<i>Plumbago zeylanica</i>	Plumbaginaceae	Chitrak
125	<i>Prosopis cineraria</i>	Mimosaceae	Shami
126	<i>Pterocarpus marsupium</i>	Fabaceae	Bijasal
127	<i>Rhynchosia minima</i>	Fabaceae	
128	<i>Schleichera oleosa</i>	Sapindaceae	Kusum
129	<i>Schrebera swietenioides</i>	Oleaceae	Moka
130	<i>Scoparia dulcis</i>	Scrophulariaceae	Ghodatulsi
131	<i>Sesbania bispinosa</i>	Fabaceae	Dhodan
132	<i>Sida acuta</i>	Malvaceae	Mahabala
133	<i>Sida alba</i>	Malvaceae	Madanmast
134	<i>Sida cordata</i>	Malvaceae	
135	<i>Sida cordifolia</i>	Malvaceae	Bala
136	<i>Sida rhombifolia</i>	Malvaceae	Atibala
137	<i>Sida rhombifolia</i> var. <i>retusa</i>	Malvaceae	Atibala
138	<i>Solanum incanum</i>	Solanaceae	Jangli bhanta
139	<i>Solanum nigrum</i>	Solanaceae	Makoi
140	<i>Solanum virginianum</i>	Solanaceae	Bhatkataiya
141	<i>Sphaeranthus indicus</i>	Asteraceae	Gorakhmundi
142	<i>Spilanthes calva</i>	Asteraceae	Akkalkara
143	<i>Tephrosia purpurea</i>	Fabaceae	Sarpunkha
144	<i>Teramnus labialis</i>	Fabaceae	Mashoni
145	<i>Terminalia arjuna</i>	Combretaceae	Arjun
146	<i>Terminalia bellirica</i>	Combretaceae	Baheda

147	<i>Thespesia populnea</i>	Malvaceae	Paraspeepal
148	<i>Tinospora cordifolia</i>	Menispermaceae	Giloy
149	<i>Tribulus terrestris</i>	Zygophyllaceae	Chota gokharu
150	<i>Trichodesma indicum</i>	Fabaceae	Andhpuspi
151	<i>Trichosanthes bracteata</i>	Cucurbitaceae	Indrayan
152	<i>Tridax procumbens</i>	Asteraceae	Ghamra
153	<i>Typha angustifolia</i>	Typhaceae	
154	<i>Uraria picta</i>	Fabaceae	Dabra
155	<i>Urginea indica</i>	Liliaceae	Korikanda
156	<i>Vallaris solanacea</i>	Apocynaceae	Phulkati, Ramsar
157	<i>Vernonia cinerea</i>	Asteraceae	Sahdevi
158	<i>Vetivera zizanioides</i>	Poaceae	Khus
159	<i>Vitex negundo</i>	Verbenaceae	Nirgudi
160	<i>Waltheria indica</i>	Sterculiaceae	
161	<i>Wattakaka volubilis</i>	Asclepiadaceae	Dudhi bel
162	<i>Withania somnifera</i>	Solanaceae	Ashwagandha
163	<i>Woodfordia fruticosa</i>	Lythraceae	Dhao, Dharu
164	<i>Wrightia tinctoria</i>	Apocynaceae	Indrajav
165	<i>Wrightia tinctoria var. rothii</i>	Apocynaceae	Dudhi
166	<i>Xanthium indicum</i>	Asteraceae	Bada gokharu
167	<i>Ziziphus mauritiana</i>	Rhamnaceae	Ber
168	<i>Ziziphus xylopyrus</i>	Rhamnaceae	Ghont

Fruit yielding

1	<i>Aegle marmelos</i>	Rutaceae	Bel
2	<i>Annona squamosa</i>	Annonaceae	Sithphal
3	<i>Artocarpus heterophyllus</i>	Moraceae	Kathal
4	<i>Buchnania lanzan</i>	Anacardiaceae	Chironji
5	<i>Capparis sepiaria</i>	Capparaceae	Hins
6	<i>Carissa carandas</i>	Apocynaceae	Karonda
7	<i>Cordia dichotoma</i>	Boraginaceae	Lasora
8	<i>Diospyros melanoxylon</i>	Ebenaceae	Tendu
9	<i>Feronia limonia</i>	Rutaceae	kaith
10	<i>Ficus racemosa</i>	Moraceae	Gular
11	<i>Grewia flavescens</i>	Tiliaceae	Chapadi
12	<i>Grewia tiliifolia</i>	Tiliaceae	Dhaman
13	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol
14	<i>Madhuca longifolia var. latifolia</i>	Sapotaceae	Mahuwa
15	<i>Mangifera indica</i>	Anacardiaceae	Aam
16	<i>Manilkara hexandra</i>	Sapotaceae	Khirni
17	<i>Morus alba</i>	Moraceae	Shehtut

18	<i>Phoenix sylvestris</i>	Arecaceae	Khajuri
19	<i>Phyllanthus emblica</i>	Euphorbiaceae	Anwala
20	<i>Pithecellobium dulce</i>	Mimosaceae	Jangli jalebi
21	<i>Psidium guajava</i>	Myrtaceae	Amrud
22	<i>Punica granatum</i>	Punicaceae	Anar
23	<i>Syzygium cumini</i>	Myrtaceae	Jamun
24	<i>Tamarindus indica</i>	Caesalpiniaceae	Imli
25	<i>Trapa natans var. bispinosa</i>	Trapaceae	Shinghada
26	<i>Ziziphus mauritiana</i>	Rhamnaceae	Ber
27	<i>Ziziphus nummularia</i>	Rhamnaceae	Jher beri
28	<i>Ziziphus oenoplia</i>	Rhamnaceae	Makor

Fuel

1	<i>Acacia caesia</i>	Mimosaceae	Aari
2	<i>Acacia leucophloea</i>	Mimosaceae	Revja
3	<i>Ailanthus excelsa</i>	Simaroubaceae	Maharukh
4	<i>Anogessius pendula</i>	Combretaceae	Kadai
5	<i>Boswellia serrata</i>	Burseraceae	Salai
6	<i>Bridelia retusa</i>	Euphorbiaceae	Karzaliya
7	<i>Catena regum spinosa</i>	Rubiaceae	Chamer karera
8	<i>Dichrostachys cinerea</i>	Mimosaceae	Kair
9	<i>Ehretia laevis</i>	Boraginaceae	Phaderu
10	<i>Grewia flavescens</i>	Tiliaceae	Jher kher
11	<i>Holarrhena pubescens</i>	Apocynaceae	Indrajav, Dudhi
12	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol
13	<i>Lannea coromandelica</i>	Anacardiaceae	Gurjan
14	<i>Leucaena leucocephala</i>	Mimosaceae	Subabhal
15	<i>Morinda pubescens</i>	Rubiaceae	Allauwa
16	<i>Naringi crenulata</i>	Rutaceae	
17	<i>Phoenix sylvestris</i>	Arecaceae	Khajuri
18	<i>Pithecellobium dulce</i>	Mimosaceae	Jangli jalebi
19	<i>Pongamia pinnata</i>	Fabaceae	Karanj
20	<i>Prosopis juliflora</i>	Mimosaceae	Vilayati babool
21	<i>Ziziphus mauritiana</i>	Rhamnaceae	Ber
22	<i>Zizyphus xylopyrus</i>	Rhamnaceae	Ghont

Timber yielding

1	<i>Acacia catechu</i>	Mimosaceae	Khair
2	<i>Acacia ferruginea</i>	Mimosaceae	Safed Khair
3	<i>Acacia leucophloea</i>	Mimosaceae	Revja
4	<i>Acacia nilotica</i>	Mimosaceae	Babool

5	<i>Acacia nilotica var. indica</i>	Mimosaceae	Babool
6	<i>Albizia lebbek</i>	Mimosaceae	Shirish
7	<i>Anogessius pendula</i>	Combretaceae	Kadai
8	<i>Artocarpus heterophyllus</i>	Moraceae	Kathal
9	<i>Azadirachta indica</i>	Meliaceae	Neem
10	<i>Bauhinia variegata</i>	Caesalpiniaceae	Kachnar
11	<i>Bombax ceiba</i>	Bombacaceae	Semal
12	<i>Boswellia serrata</i>	Burseraceae	Salai
13	<i>Bridelia retusa</i>	Euphorbiaceae	Karzaliya
14	<i>Dalbergia sisoo</i>	Fabaceae	Sisam
15	<i>Dendrocalamus strictus</i>	Poaceae	Bans
16	<i>Diospyros melanoxylon</i>	Ebenaceae	Tendu
17	<i>Erythrina suberosa</i>	Fabaceae	Gadhpalas
18	<i>Feronia limonia</i>	Rutaceae	kaith
19	<i>Gardenia latifolia</i>	Rubiaceae	Safedpapra
20	<i>Gmelina arborea</i>	Verbenaceae	Khamer
21	<i>Grewia tiliifolia</i>	Tiliaceae	Dhaman
22	<i>Holoptelea integrifolia</i>	Ulmaceae	Chirol

12	<i>Setaria glauca</i>	Poaceae	Bandra
13	<i>Sporobolus diander</i>	Poaceae	

10. Vegetational Analysis

10.1: A comparative account of plant species according to habit

	Category	No. of Species	Percentage (%)
A	Trees	158	21
B	Shrubs	98	13
C	Herbs	356	47
D	Climbers	83	11
E	Grasses	63	8
	Total	758	100

Fig. 10.1: Total No. of Plant species of Chambal eco-region on the basis of Habit

10.2: A comparative account of vegetational analysis of various districts (No. of species)

Habit of Plants	Ashok nagar	Guna	Gwalior	Morena	Sheopur	Shivpuri	Bhind	Datia
Trees	78	96	105	39	67	108	34	45
Shrubs	32	39	60	27	34	40	22	22
Herbs	125	205	195	66	87	184	59	33
Climbers	42	43	52	17	23	50	21	13
Grasses	10	29	26	21	43	32	09	08
Total	287	412	438	170	254	414	145	121

11. A Comparative account of no. of species according to different categories of Uses in various districts.

In the following table a comparison among various districts of Chambal eco-region in reference to uses of plants has been made.

Sr. no.	Uses	Ashok Nagar	Guna	Gwalior	Morena	Sheopur	Shivpuri	Bhind	Datia
1	Medicinal	136	172	144	70	97	168	75	50
2	Fruit yielding	25	24	39	20	23	28	10	17
3	Fuel	20	26	14	04	17	22	05	03
4	Timber yielding	28	40	22	11	24	34	07	05
5	Gum, resin	09	11	07	06	09	09	04	02
6	Fibre yielding	03	05	07	05	07	04	03	01
7	Ornamental	38	38	106	14	32	69	10	25
8	Vegetable	18	24	23	13	11	24	09	04

Table: 13. 1. RET Species of Chambal Region.

Sr. No.	Name of species	Status
1	<i>Abrus precatorius</i>	Near Threatened
2	<i>Acorus calamus</i>	Endangered
3	<i>Andrographis paniculata</i>	Vulnerable
4	<i>Aristolochia indica</i>	Near Threatened
5	<i>Asparagus racemosus</i>	Near Threatened
6	<i>Bacopa monnieri</i>	Vulnerable
7	<i>Butea monosperma var. lutea</i>	Endangered
8	<i>Caesalpinia bonduc</i>	Vulnerable
9	<i>Caesalpinia decapetala</i>	Vulnerable
10	<i>Capparis decidua</i>	Vulnerable
11	<i>Centella asiatica</i>	Vulnerable
12	<i>Ceropegia bulbosa</i>	Endangered
13	<i>Chlorophytum tuberosum</i>	Vulnerable
14	<i>Commiphora wightii</i>	Rare
15	<i>Costus speciosus</i>	Vulnerable
16	<i>Curculigo orchioides</i>	Endangered
17	<i>Curcuma amada</i>	Endangered
18	<i>Curcuma angustifolia</i>	Vulnerable
19	<i>Dioscorea bulbifera</i>	Vulnerable
20	<i>Gloriosa superba</i>	Vulnerable
21	<i>Gymnema sylvestre</i>	Under Threat
22	<i>Manilkara hexandra</i>	Near Threatened
23	<i>Mucuna pruriens</i>	Near Threatened
24	<i>Operculina petaloidea</i>	Endangered
25	<i>Oroxylum indicum</i>	Vulnerable
26	<i>Plumbago zeylanica</i>	Vulnerable
27	<i>Prosopis cineraria</i>	Endangered
28	<i>Psorelea corylifolia</i>	Vulnerable
29	<i>Rauvolfia serpentina</i>	Endangered
30	<i>Saraca asoca</i>	Endangered
31	<i>Spilanthes calva</i>	Vulnerable
32	<i>Tinospora cordifolia</i>	Vulnerable
33	<i>Tylophora indica</i>	Vulnerable
34	<i>Uraria picta</i>	Vulnerable
35	<i>Urginea indica</i>	Vulnerable

1. Information on RET Species of Chambal region-*Abrus precatorius*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Abrus</i>	<i>precatorius</i>		Linn.	Fabaceae	Global / National Through out Tropics

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Near Threatened	Used in Medicine	No	Taxonomic	By Seeds	

5. Endemic (Y/N): No

6. Known origin: Tropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
20	Seeds collected	-	-	-	Good

10. Availability/accessibility: Found in some forest localities.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 33

2. Information on RET Species of Chambal region- *Acorus calamus*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Acorus</i>	<i>calamus</i>		Linn	Araceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	Medicinal	By rhizome	

5. Endemic (Y/N): No

6. Known origin: North Temperate regions & S-E Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
21	Seeds collected	-	-	-	Good

10. Availability/accessibility: Now a days rarely seen near aquatic places.

11. Inclusion in national recovery plans or conservation management programmes (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Important in recovery

13. Security of accession/Regeneration status: Good

14. Accession No.: - IOE – 1

3. Information on RET Species of Chambal Region- *Andrographis paniculata*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	Geographic distribution
<i>Andrographis</i>	<i>paniculata</i>		(Burm.f.) Wallich ex Nees	Acanthaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By Seeds	Demanded By Pharmas

5. Endemic (Y/N): No

6. Known origin: Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
30	Seeds collected	-	-	-	Good

10. Availability/accessibility: Now not common in forest areas.

11. Inclusion in national recovery plans or conservation management programmes (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Good

13. Security of accession/Regeneration status: Good

14. Accession No.: - IOE - 2

4. Information on RET Species of Chambal region- *Aristolochia indica*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Aristolochia</i>	<i>indica</i>		Linn.	Aristolochiaceae	Global National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Near Threatened	Used in Medicine	No	Taxonomic	By Seeds	

5. Endemic (Y/N): No

6. Known origin: Tropical & Temperate region

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
3	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rare

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 3

5. Information on RET Species of Chambal region- *Asparagus racemosus*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Asparagus</i>	<i>racemosus</i>		Willd.	Liliaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Near Threatened	Used in Medicine	No	Taxonomic	By Seeds & roots	

5. Endemic (Y/N): No

6. Known origin: Old World

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
15	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rare in forest but planted as ornamental plant in gardens.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 39

6. Information on RET Species of Chambal Region- *Bacopa monnieri*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Bacopa</i>	<i>monnieri</i>		(L.) Wettst.	Scrophulariaceae	Global / National Subtropical

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used as brain tonic also in nervous disorders.	No	Yes	Vegetatively propagated	Highly Exploited

5. Endemic (Y/N): No

6. Known origin: Subtropical region especially America.

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
20	By vegetative propagation	No	No	No	Good

10. Availability/accessibility: In moist places along water sources

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 121

7. Information on RET Species of Chambal region- *Butea monosperma* var. *lutea*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	Geographic distribution
<i>Butea</i>	<i>monosperma</i>	<i>var. lutea</i>	(Witt) Maheshwari	Fabaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used In Medicine	No	Taxonomic	By stem cutting	

5. Endemic (Y/N): No

6. Known origin: India

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
1	-	-	-	-	Good

10. Availability/accessibility: Rare in the forest

11. Inclusion in national recovery plans or conservation management programmes

a .(Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Important in recovery

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 14

8. Information on RET Species of Chambal Region- *Caesalpinia bonduc*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Caesalpinia</i>	<i>bonduc</i>		(L.) Roxb.	Caesalpiniaceae	Global / National Tropics & Sub tropic

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in stomach disorders also as antidote to poison.	No	Yes	By Seeds	Loss of habitat, Exploitation of seeds.

5. Endemic (Y/N): No

6. Known origin: Tropics and Subtropics.

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
1	By seed	No	No	No	Good

10. Availability/accessibility: Along roadside and forest edges.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 122

9. Information on RET Species of Chambal region- *Caesalpinia decapetala*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Caesalpinia</i>	<i>decapetala</i>		(Roth.) Alston	Caesalpiniaceae	Global/ National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By seeds	

5. Endemic (Y/N): No

6. Known origin: India

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
1	-	-	-	-	Good

10. Availability/accessibility: Rare in forest localities

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 25

10. Information on RET Species of Chambal Region- *Capparis decidua*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	2. Geographic distribution
<i>Capparis</i>	<i>decidua</i>		(Forsk.) Edgew	Capparaceae	Global / National Topics & Subtropics

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Fruits used for preparation of Pickle, plant as a fuel	No	Yes	By Stem cutting	Threatened due to introduction of <i>Prosopis juliflora</i>

5. Endemic (Y/N): No

6. Known origin: Tropics & subtropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
5	By stem cutting	No	No	No	Good

10. Availability/accessibility: In the ravines and dry regions

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 123

11. Information on RET Species of Chambal region- *Centella asiatica*

1. Taxon name and authority:

Genus	Species	Intra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Centella</i>	<i>asiatica</i>		(Linn.) Urban	Apiaceae	Global / National Temperate & tropical regions

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Aromatic Compounds	By roots	Propagated By Pharmas.

5. Endemic (Y/N): No

6. Known origin: Tropical and Temperate regions

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
25	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rarely found near moist places.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Yes, In garden

14. Accession no.: - IOE – 22

12. Information on RET Species of Chambal region- *Ceropegia bulbosa*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Ceropegia</i>	<i>bulbosa</i>		Roxb.	Asclepiadaceae	Global/ National Asian countries, Sub Himalayan region

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	Taxonomic	By seeds	Highly demanded

5. Endemic (Y/N): No

6. Known origin: Tropical regions of the old world

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
2	-	-	-	-	Good

10. Availability/accessibility: Rarely found in moist places.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Yes, in garden

14. Accession no.: - IOE – 119

13. Information on RET Species of Chambal region- *Chlorophytum tuberosum*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Chlorophytum</i>	<i>tuberosum</i>		(Roxb.) Baker	Liliaceae	Global/ National Paleotropics

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By tuberous roots	Over exploited

5. Endemic (Y/N): No

6. Known origin: Africa

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
12	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rarely found near moist places.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Yes, in garden

14. Accession no.: - IOE – 120

14. Information on RET Species of Chambal Region- *Commiphora wightii*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Commiphora</i>	<i>wightii</i>		(Arn.) Bhandari	Burseraceae	Global / National In Desert Regions

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Rare	Used in Medicine, Agarbattis	Yes	Yes	By Stem cutting	Highly Exploited

5. Endemic (Y/N): No

6. Known origin: Desert part of Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
8	By stem cutting	-	-	-	Good

10. Availability/accessibility: Rare in Ravines and Desert of Rajasthan

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE -18

15. Information on RET Species of Chambal region- *Costus speciosus*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Costus</i>	<i>speciosus</i>		(J. Koenig Sm.)	Costaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By rhizome	

5. Endemic (Y/N): No

6. Known origin: Tropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
5	-	-	-	-	Good

10. Availability/accessibility: Rarely found in forest

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 4

16. Information on RET Species of Chambal Region- *Curculigo orchoides*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	13. Geographic distribution
<i>Curculigo</i>	<i>orchoides</i>		Gaertn.	Hypoxidaceae	Global / National Tropical

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Tubers used for as tonic, in skin diseases, piles, diarrhoea asthma.	No	Yes	By tubers	Highly Exploited for medicinal value

5. Endemic (Y/N): No

6. Known origin: Tropical regions especially southern hemisphere.

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
5	By tubers	No	No	No	Good

10. Availability/accessibility: In Sal & mixed forest of Guna district

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 124

17. Information on RET Species of Chambal region- *Curcuma amada*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Curcuma</i>	<i>amada</i>		Roxb.	Zingiberaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	Medicinal	By rhizome	

5. Endemic (Y/N): No

6. Known origin: Palaeotropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
6	-	-	-	-	Good

10. Availability /accessibility: Rare near the wetlands in forest.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 6

18. Information on RET Species of Chambal region- *Curcuma angustifolia*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Curcuma</i>	<i>angustifolia</i>		Roxb.	Zingiberaceae	Global / National India

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine				

5. Endemic (Y/N): No

6. Known origin: Palaetropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
7	-	-	-	-	Good

10. Availability/ accessibility: Found in some forest localities

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 5

19. Information on RET Species of Chambal Region- *Dioscorea bulbifera*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	13. Geographic distribution
<i>Dioscorea</i>	<i>bulbifera</i>		Linn.	Dioscoreaceae	Global / National Tropical & Subtropical region

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Tubers & bulbins are edible	No	Yes	By tubers and bulbins	Highly Exploited for edible tubers

5. Endemic (Y/N): No

6. Known origin: Tropical & Subtropical region

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
3	By tubers and bulbins	No	No	No	Good

10. Availability/accessibility: In mixed & Sal forest especially on slopes.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No (Included under MP Threatened plants list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 125

20. Information on RET Species of Chambal Region- *Gloriosa superba*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Gloriosa</i>	<i>superba</i>		Linn.	Liliaceae	Global / National Tropical Africa and Asia

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied(at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	Yes	Taxonomic	Good, By roots	Threatened

5. Endemic (Y/N): No but population is declining in several parts of MP.

6. Known origin: Central Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
2	Seeds collected	-	-	-	Good

10. Availability/accessibility: Threatened in many forest localities of MP.

11. Inclusion in national recovery plans or conservation management programmes

10. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N):

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE – 34

21. Information on RET Species of Chambal region- *Gymnema sylvestre*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Gymnema</i>	<i>sylvestre</i>		(Retz.) R. Br. ex Schult	Asclepiadaceae	Global / National In Tropical Countries

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Under Threat	Used in Medicine	Yes	Taxonomic	Yes	Highly Exploited

5. Endemic (Y/N): Now restricted in a few localities.

6. Known origin: Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
4	Seeds collected	-	-	-	Good

10. Availability/accessibility: Not easily available (Only at few sites in forests of Gwalior & Shivpuri

11. Inclusion in national recovery plans or conservation management programmes (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Medium

14. Accession No.: - IOE -11

22. Information on RET Species of Chambal region-*Manilkara hexandra*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
Manilkara	hexandra		(Roxb.) Dubard	Sapotaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Near threatened	Used in Medicine	No	No	By seeds	

5. Endemic (Y/N): No

6. Known origin: Tropical region

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
6	Seeds collected	-	-	-	Good

10. Availability / accessibility: Found in the forest localities, also planted at roadside.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not Known

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 117

23. Information on RET Species of Chambal region- *Mucuna pruriens*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Mucuna</i>	<i>pruriens</i>		Bak.	Fabaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Near threatened	Used in Medicine	No	Taxonomic	Through seeds	

5. Endemic (Y/N): No

6. Known origin: Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
3	Seeds collected	-	-	-	Good

10. Availability/accessibility: In some forest localities.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 19

24. Information on RET Species of Chambal region-*Operculina petaloidea*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Operculina</i>	<i>petaloidea</i>		(choicy) Oost.	Convolvulaceae	Global / National India

2. National conservation status ranking (National Red Data Lists): Rare in flora of Madhya Pradesh

3. IUCN Red Data Book category applied (at national and international levels): Endangered

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	In biodiversity	By seeds	

5. Endemic (Y/N): Yes

6. Known origin: India

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
5	-	-	-	-	Good

10. Availability/accessibility: Rarely found in forest

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): Yes

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 23

25. Information on RET Species of Chambal region-*Oroxylum indicum*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Oroxylum</i>	<i>indicum</i>		(L.) Venten.	Bignoniaceae	Global / National Indo-Malesia

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine, Seeds are eaten	No	In biodiversity	By seeds	

5. Endemic (Y/N): No

6. Known origin: India

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
5	-	-	-	-	Good

10. Availability/accessibility: Planted as a ornamental plant in gardens.

11. Inclusion in national recovery plans or conservation management programmes

b. (Y/N): No. (Included under MP threatened plant list)

12. Participant in Relevant Habitat Recovery (Y/N): Yes

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 126

26. Information on RET Species of Chambal region- *Plumbago zeylanica*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Plumbago</i>	<i>zeylanica</i>		Linn.	Plumbaginaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By seeds	

5. Endemic (Y/N): No

6. Known origin: Tropics of the old world

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
10	-	-	-	-	Good

10. Availability/accessibility: Rarely found in the forest localities.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 7

27. Information on RET Species of Chambal region- *Prosopis cineraria*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Prosopis</i>	<i>cineraria</i>		(L.) Druce	Mimosaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book categories applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	No		

5. Endemic (Y/N): No

6. Known origin: Tropics & Subtropics

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
2	-	-	-	-	Good

10. Availability/accessibility: Rarely found in the ravines

11. Inclusion in national recovery plans or conservation management programmes

1. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 20

28. Information on RET Species of Chambal region- *Psoralea corylifolia*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Psorelea</i>	<i>corylifolia</i>		Linn.	Fabaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By seeds	

5. Endemic (Y/N): No

6. Known origin: India, Ceylon

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
6	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rarely found in forest localities.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Medium

14. Accession no.: - IOE – 13

29. Information on RET Species of Chambal Region- *Rauvolfia serpentina*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Rauvolfia</i>	<i>serpentina</i>		(L.) Benth ex Kurz	Apocynaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): Rare in many states & in M.P. also

3. IUCN Red Data Book categories applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in Medicine	No	Taxonomic	By seeds	Highly demanded

5. Endemic (Y/N): No

6. Known origin: Desert localities of Asia

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
10	-	-	-	-	Good

10. Availability/accessibility: Rare

11. Inclusion in national recovery plans or conservation management programmes

b. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Slow regeneration value

14. Accession No.: - IOE – 8

30. Information on RET Species of Chambal region- *Saraca asoca*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Saraca</i>	<i>asoca</i>		(Roxb.) De Wilde	Caesalpiniaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Endangered	Used in medicine	No	Taxonomic	By stem cutting	

5. Endemic (Y/N): No

6. Known origin: Himalaya, Burma, Ceylon

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
1	-	-	-	-	Good

10. Availability/accessibility: Rare. Planted as a ornamental plant in gardens.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): Not known

13. Security of accession/Regeneration status: Slow regeneration value.

14. Accession no.: - IOE – 12

31. Information on RET Species of Chambal region- *Spilanthes calva*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Spilanthes</i>	<i>calva</i>		DC.	Astearaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Yes	By seeds	

5. Endemic (Y/N): No

6. Known origin: Tropics, India, Ceylon

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
28	Seeds collected	-	-	-	Good

10. Availability/accessibility: Found in forest, also planted in gardens.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 21

32. Information on RET Species of Chambal region- *Tinospora cordifolia*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Tinospora</i>	<i>cordifolia</i>		(Willd.) Miers ex Hook. f. & Thoms	Menispermaceae	Global / National Global

2. National conservation status ranking (National Red Data Lists): No

3. IUCN Red Data Book category applied (at national and international levels): No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	By seeds	

5. Endemic (Y/N): No

6. Known origin: Indo-Malaya

7. Location of the Herbarium specimen: Jiwaji University.

8. Name of taxonomist/identifier: Prof. Ashok K. Jain

9. Status/type and condition of *ex situ* accession:

Live Plant	Seed (No. of accession)	Pollen (No. of accession)	Cryo/ tissue (No. of accession)	Others (No. of accession)	Status of collection (Good or poor)
8	Seeds collected	-	-	-	Good

10. Availability/accessibility: Rarely found in the forest.

11. Inclusion in national recovery plans or conservation management programmes

a. (Y/N): No

12. Participant in Relevant Habitat Recovery (Y/N): No

13. Security of accession/Regeneration status: Good

14. Accession no.: - IOE – 43

33. Information on RET Species of Chambal Region- *Tylophora indica*

1. Taxon name and authority:

Genus	Species	Infra-specific status	Author(s)	Family	❖ Geographic distribution
<i>Tylophora</i>	<i>indica</i>		(Brum.f.) Merr	Asclepiadaceae	Global / National In Tropical countries

2. National conservation status ranking (National Red Data Lists): Nil

3. IUCN Red Data Book category applied(at national and international levels):No

4. Priority category:

IUCN red list category	Local economic importance	Flagship/ keystone species	Scientific value	Special reintroduction value	Others
Vulnerable	Used in Medicine	No	Taxonomic	Through root cutting	Demanded By Pharmas

5. Endemic (Y/N): No

6. Known origin: Asia

7. Location of the Herbarium specimen: Jiwaji University.

13.2. Description of RET Species of Chambal Eco-region and Factors of Threat.

1. *Abrus precatorius* Linn.

Perennial climbing shrubs, Leaves pinnate. Flower in long dense pedunculate racemes, pinkish white. Pods oblong with a sharp deflexed beak. Seeds 3-5, subglobose, shining scarlet with a black spot at hilum.

Decoction of root is used in nervous disorders. Root powder is given in cough and cold. Seeds powder is used as fish poison.

Threat factors: Habitat loss, collection for medicinal purposes, grazing, Edaphic factors.

2. *Acorus calamus* Linn.

A herbaceous plant with creeping aromatic rhizomes. The dried rhizome constitutes the drug calamus and is used in medicine. Due to presence of volatile oil it is used as carminative, expectorant and carminative. It is used in asthma, diarrhoea and dysentery. Leaves and rhizome are also used in flavoring drinks, perfumery and preparing insecticides. Local people use the corm of this plant for inhaling against sinusitis.

Threat Factors: Some two decades back the species used to occur at several sites near river banks at Shivpuri, Gwalior, Chanderi and Sheopur districts but now its population has declined and the plants are rarely found at a few sites only. This is due to drought situation for the last several years and excessive collection by traders. Other factors are harvest for medicine, loss of habitat.

3. *Andrographis paniculata* (Burm.f.) Wallich ex Nees

An erect branched annual herb. The drug kalmegh is obtained from all parts of plant body except roots. It is a bitter tonic, use against curing fevers, worms, and dysentery and general weakness.

Threat Factors: The plant is widely collected by traders because of its use as an ingredient in several ayurvedic preparations. It was very common in all forest localities of Gwalior and Chambal divisions forest but now passing through a severe threat condition due to large scale collection. Drought for the last several years has also affected its occurrence. Grazing and cutting of fodder also has caused a large quantity destruction of this species.

4. *Aristolochia indica* Linn.

Climbing herbs, leaves simple, opposite. Flowers in axillary racemes. Distributed through the tropical and temperate regions of the world. It is reported from some forest localities of Gwalior and Chambal divisions also.

The drug is obtained from dried stem and roots; in small doses it promotes digestion and menstruation.

Threat Factors: The species has been wiped out from several forest localities of Gwalior and its surrounding areas due to harvesting for medicine in large scale, fire, traded for parts, loss of habitat etc.

5. *Asparagus racemosus* Willd.

Undershrub with tuberous roots, stem woody, terrate, spines decurved. Flowers small, white, berries scarlet when ripe, globose.

Roots are used as tonic, diuretic, galactagogue and in dyspepsia, while oil is used for nervous and rheumatic complaints.

Threat factors: Collection for medicinal purposes, clearing of forest areas, drought.

6. *Bacopa monneri* (L.) Wettst.

Suberect or creeping herb, rooting at nodes. Leaves opposite, decussate. Flowers axillary, solitary, purple or pinkish. Capsule ovoid.

Plant is a nervine tonic, used in asthma, epilepsy and diuretic. Stem and leaves are used against antidote to snake bite.

Threat factors: Excessive collection for medicinal purposes, drought.

7. *Butea monosperma* var. *lutea* (Witt.) Maheshwari

A medium sized deciduous tree with young pubescent branches. Leaves 3-foliate, flowers in clusters yellowish white, pods flat.

Threat factors: Clearing of forest, Harvest for timber.

8. *Caesalpinia bonduc* (L.) Roxb.

Scandent or climbing shrub, branches hairy armed with straight prickles. Leaves bipinnate; leaflets 10-24 pairs, opposite. Flowers yellow. Pods covered with sharp wiry prickles; seeds two, dark gray.

Used in stomach disorders also as antidote to poison.

Threat factors: Loss of habitat, Exploitation of seeds.

9. *Caesalpinia decapetala* (Roth) Alston

A scandant prickly shrub, flowers in terminal or axillary racemes, yellow.

Leaves are laxative and are applied to burns. Roots are purgative.

Threat Factors: Till a few decades ago the species was common on hill tops of Pachmarhi Biosphere Reserve but now can be seen only at few places. Its illegal cutting has brought it to threat category. Other reasons are drought, loss of habitat and grazing of animals.

10. *Capparis decidua* (Forsk.) Edgew

Nearly leafless glabrous shrubs or small trees. Leaves only on young shoots, glabrous. Flowers red or scarlet. Fruits globose, smooth, red when ripe.

Fruits used for preparation of pickle, plant as a fuel.

Threat factors: Threatened due to introduction of *Prosopis juliflora*. Also excessively used as fuel.

11. *Centella asiatica* (Linn.) Urban

A creeping herb, rooting at nodes. Leaves reniform with toothed margins, flowers minute pinkish red.

Drug is obtained from fresh or dried leaves and stem of this plant. The plant contains a drug called asiaticoside, which is responsible for use against leprosy. The plant is also considered as an alternative and tonic for brain.

Threat Factors: Drying of moist places due to drought, grazing and mass collection by traders has brought the species under threat stage. Herds of cattle from Rajasthan cause a lot of destruction to this species.

12. *Ceropogia bulbosa* Roxb.

An annual slender climbing herb. Leaves opposite lanceolate, glabrous. Flowers solitary axillary.

Fresh tubers are tonic, digestive and eaten for strengthening.

Threat factors: Few years ago the species was very common but now can be spotted at only few sites. Harvest for tubers, exploitation for medicinal value has brought this species in threat category.

13. *Chlorophytum tuberosum* (Roxb.) Baker

An annual herb. Leaves in rosette sessile, linear. Flowers in terminal racemes, white.

Tuberous roots are edible and used as tonic.

Threat Factors: Harvest for tuberous roots, Habitat loss, over exploitation, traded for parts, Fire.

14. *Commiphora wightii* (Arn.) Bhandari

A thorny shrub. Leaves trifoliate, terminal leaflet larger than the lateral leaflets. Flowers pinkish white.

Gum, resins are astringent, antiseptic, carminative and are used in snakebite and scorpion-sting. The gum is also used in arthritis and gout.

Threat Factors: The plants of this species were very common in ravine localities of Chambal river in Bhind and Morena districts. Excessive uprooting of its plants now has caused a serious threat. Now it is hardly seen in a few localities. For its use in agarbatti industry, the gum is taken out and instead of proper technique of tapping the entire plant is uprooted. Other reasons are trading for parts, loss of habitat.

15. *Costus speciosus* (Koen.) Sm.

Erect rhizomatous herbs. Leaves oblong-lanceolate and spirally arranged. Flowers in terminal ovoid heads, bracts red, corolla white. Capsule bright red.

Tubers are edible & good for digestion and health. Roots are astringent, purgative, stimulant, and anthelmintic.

Threat factors: Drought, Heavy grazing, habitat loss, harvest for medicine, traded for parts, harvest for food.

16. *Curculigo orchoides* Gaertn.

Herbs. Rootstock tuberous, covered with fleshy roots and remains of old leaves. Leaves very variable, linear-lanceolate. Flowers appear almost at the ground level, bisexual, 1-3 opening at time, yellow, on a beak like hypanthium. Fruits subulate to ovoid. Seeds many, globose.

Tuberous roots are used for skin diseases, as tonic, diuretic, demulcent, in piles, diarrhea, jaundice and asthma.

Threat factors: Highly exploited for medicinal value.

17. *Curcuma amada* Roxb.

Herbs with pale yellow rhizome. Leaves oblong-elliptic acuminate at apex. Flowers in spikes from centre of leafy branches, floral bracts white, corolla white or pale yellow. Ovary villosus, capsule globose. Rhizomes are edible, carminative, cooling and applied to sprains and muscular swelling.

Threat factors: Harvest for medicine in a large scale, traded for parts, harvest for food and collection for marketing.

18. *Curcuma angustifolia* Roxb.

Herbs with pale yellow & aromatic roots. Leaves oblong-lanceolate, flowers in lateral 8 – 14 cm long spikes, corolla lobes yellow, and ovary villosus.

Rhizomes are digestive and demulcent.

Threat factors: Harvest for medicine in a large scale, traded for parts, loss of habitat, harvest for marketing.

19. *Dioscorea bulbifera* Linn.

Large climbers. Tubers solitary, globose-pyriform. Stems twining to the left, terete, grooved. Bulbils abundant, axillary, rounded. Leaves simple, alternate, broadly ovate-cordate. Male flowering axes 1-4, on leafless branches, pendulous. Flowers white, pink or brownish white. Female flowering axes 1 or 2 from a leaf axil, directed downwards. Capsule oblong, slightly widened upwards; wings rounded. Seeds winged at base.

Tubers and bulbils are edible.

Threat Factors: Highly exploited for edible tubers.

20. *Gloriosa superba* Linn.

A rare climber, leaves simple, leaf apex modified into tendril for climbing. Flowers in racemes, inverted, reddish yellow.

Tubers are regarded as tonic, stomachic and anthelmintic in small doses. They also promote labour pain and are useful in gout and rheumatism.

Threat Factors: The plant was very common in forest localities of Gwalior, Sheopur, Vijaypur, Guna and Chanderi regions. The species is extensively collected due to its use during labor pain and delivery. Due to specific pattern and colour of leaves its plants are easily identified and easily collected even by unknown persons. Some times its plants are eradicated unknowingly while cutting trees on which it gets support. Other factors are harvest for medicine, loss of habitat, traded for roots, fire etc.

21. *Gymnema sylvestre* (Retz.) R. Br. Ex Schult

A large pubescent climber. The plant is rarely found wild due to over exploitation for leaves, which are referred for the treatment of diabetes.

Threat Factors: The plant was very common in forest localities especially in rock crevices of Shivpuri, Gwalior, Guna and other forest localities. Now due to its popularity as a key drug against diabetes local people have started large-scale collection. Presently the plant is found only at a few places. It is over exploited for its leaves which are used as a drug against diabetes. Loss of habitat, fire etc.

22. *Manilkara hexandra* (Roxb.) Dubard

Trees with deeply furrowed, grey bark. Leaves obovate or oblong. Flowers axillary, solitary on in fascicles, white. Berries ellipsoid, yellow when ripe.

Wood is used for house building, while bark is used as medicines. Fruits are eaten. Oil is extracted from the seeds.

Threat factors: Drought, cutting for fuel, timber. Fruits are harvested for edible purpose.

23. *Mucuna pruriens* (Linn.) DC.

A large extensive annual climber. Leaves trifoliate, pods densely clothed with stinging hairs. Seeds are used in nervine tonic.

Threat Factors: Local people use the seeds as aphrodisiac therefore; it is widely collected and sold in the market. Due to cutting of trees and fodder now the species has come under threatened stage. Continuous drought of past several years also has caused a severe threat to its population.

24. *Operculina petaloidea* (Choisy) Ooststroom

A large climbing shrub, leaves ovate elliptic, shallowly cordate, with rounded base, 4-8 cm long and 2.5-6 cm broad. Flowers yellow in 1- many flowered cymes. Corolla densely hirsute except on the basal tube. Fl: February.

Roots are purgative, used in scorpion sting and snakebite.

Threat Factor: Excess collection, drought, habitat loss, exotics invasion, loss of habitat.

25. *Oroxylum indicum* (L.) Venten.

Trees, 10-15 m high, irregularly branched. Leaves usually tufted towards twig end; Leaflets ovate-elliptic. Flowers solitary on a tubercle, arranged in erect racemes. Calyx dirty violet. Corolla deep maroon, glandular inside. Capsules flat, pendent, tapering at both ends.

Seeds are sometime eaten. Rootbark useful in diarrhea and dysentery, as astringent and tonic.

Threat factors: Harvest for medicine. Traded for parts. Bark is unscientifically harvested without considering immature plants.

26. *Plumbago zeylanica* Linn.

Straggling shrub, Leaves ovate. Flowers in branched spikes, white. Capsule oblong.

Root powder is used for inducing abortion. Leaves are used in diarrhoea. Root is used as vesicant, stimulant.

Threat factors: Clearing of forest areas, collection for medicinal purposes, loss of habitat, traded for parts.

27. *Prosopis cineraria* (Linn.) Druce

A small tree with grayish bark, armed with scattered prickles. Leaves bipinnate, leaflets 8 – 12 pairs. Flowers in terminal drooping spikes yellow. Pods cylindrical straight torulose, seed dull brown. Bark paste is applied in wounds.

Threat factors: Cutting for fuel, forest clearance. It is also used in religious purpose eg. In marriage ceremony.

28. *Psoralea corylifolia* Linn.

An annual herb, leaves simple alternate, flowers in axillary raceme, purple. Pods ovoid 1 seeded. Seeds are used for various skin diseases.

Threat factors: Drought, Habitat loss, invasion of exotics, grazing.

29. *Rauvolfia serpentina* (L.) Benth. ex Kurz

An erect glabrous under shrub. Leaves whorled, flower whitish pink. The plant is endangered due to over exploitation of roots, which is used for medicine. The drug is mainly used as sedative and reducing blood pressure. Local people use the roots of this species in insomnia.

Threat Factors: Some three decades ago the species was very common in the vicinity of palace of Scindias. It was also predominant in some forest localities at Shivpuri, Sheopur and Chanderi towns. Now due to over exploitation it has almost gone from all localities. Due to construction of colonies in palace vicinity the species has gone from there too. Other threat factors are over exploitation for medicinal purpose, loss of habitat, grazing of animals, drought etc.

30. *Tylophora indica* (Burm. f.) Merr

Twining shrub, leaves simple, opposite, hispid. Flowers in cymes greenish yellow. The drug is obtained from dried roots, which is used against asthma, bronchitis and dysentery.

Threat Factors: Earlier reports indicate the occurrence of this species in Shivpuri forest but now no plant is seen in any locality of Chambal and Gwalior divisions. Plants leaves and roots are considered as a remedy for asthma due to this it is over exploited from the forest. Other factors are cutting of trees on which it is supported, fire, drought etc.

31. *Saraca asoca* (Roxb.) de Wilde

A medium sized evergreen tree. Leaves paripinnately compound, young leaves reddish,

Flowers in racemes. Pods small flat, green.

Threat Factors: Clearing of forests and change of habitat. It is also harvested for medicinal purposes.

32. *Spilanthes calva* DC.

Annual herbs with leaves opposite. Heads solitary, terminal and axillary yellow. Achenes dark brown glabrous ciliate. Locally floral heads are used in toothache.

Threat factors: Grazing, habitat loss, termites, pesticides etc.

33. *Tinospora cordifolia* (Willd.) Miers ex Hook. f. & Thoms.

Large deciduous climbers with lenticellate, corky stems. Leaves deeply cordate with large basal lobes. Flowers unisexual, Drupelets pisiform, deep red.

Whole plant is used in indigenous drugs.

Threat factors: Habitat loss, clearing of forest areas, collection for marketing.

34. *Uraria picta* (Jacq.) Desv.

Erect perennial herb, leaves 3-5 foliate, flowers in terminal racemes.

Fruit is used in sore mouths of children and plant is considered as antidote to snakebite.

Threat Factors: The plant was common in Shivpuri and Sheopur Kalan forests but now has come under endangered stage due to excessive collection for various purposes. The other major reason for its endangered stage is drought.

35. *Urginea indica* (Roxb.) Kunth

Herbs with linear leaves. Racemes erect 15 – 30 cm long flower distant, perianth greenish white. Capsule ellipsoid 6 – 9 seeded in each cell. Bulbs are used as cardiotonic, stimulant, diuretic and Alcoholic extract of bulbs are referred to posses anticancerous property.

Threat factors: Drought, habitat loss, collection for medicinal purposes

14. Description of some focal species of the region and factors of threat:

Besides earlier mentioned RET species, status of some other species which are otherwise important from socio-economic point of view is also studied. These species play an important role in the life of local people. It was observed that the following such species are also passing through critical stage. Their population is depleting at a very fast rate. Though not today but in near future many of such species may fall under threat category.

1. *Asparagus racemosus*: Undershrub with tuberous roots, stem woody, terrate, spines decurved. Flowers small, white, berries scarlet when ripe, globose.

Roots are used as tonic, diuretic, galactagogue and in dyspepsia, while oil is used for nervous and rheumatic complaints.

Threat factors: Excessive collection for medicinal purposes, forest clearance, drought. Its tuberous roots are considered as a tonic so the tribal peoples collect these tubers from forest and sold to the traders.

2. *Bacopa monneri*: Suberect or creeping herb, rooting at nodes. Leaves opposite, decussate. Flowers axillary, solitary, purple or pinkish. Capsule ovoid.

Plant is a nervine tonic, used in asthma, epilepsy and diuretic. Stem and leaves are used against antidote to snake bite.

Threat factors: Excessive collection for medicinal purposes, drought.

3. *Boswellia serrata*: Deciduous tree with smooth grey bark. Leaves compound crowded at the end of branches. Flowers small in axillary racemes. Fruit a drupe, green, smooth.

Gum obtained is diuretic, astringent, used in rheumatism, nervous and skin diseases.

Threat factors: Clearing of forest, wrong technique of gum yielding, cutting for fuel, fire.

4. *Buchanania lanza*: Deciduous tree with rough bark, young branches tomentose. Leaves simple, elliptic-oblong, emarginated. Flowers small, greenish-white in long panicles. Drupes black, stone woody; seeds edible.

Gum is used in diarrhoea. Seeds are used as dry fruits.

Threat factors: Highly exploited for seeds, clearing of forests.

5. *Butea monosperma*: Medium sized deciduous tree. Leaves 3-foliate, unequal. Flowers in long fascicles on leafless branches, scarlet or orange. Pods stalked, flat, 1 seeded.

Seeds are anthelmintic. Gum is astringent and used in diarrhoea and dysentery. Flowers are astringent, diuretic, depurative and aphrodisiac.

Threat factors: Cutting for fuel & timber, forest clearance. Its leaves are collected for making *Donas*, which sold in the market.

6. *Celastrus paniculatus*: An unarmed large woody climber. Leaves simple, alternate. Panicles large, terminal, pubescent. Male flowers minute, pale green. Female flowers having sepals & petals. Capsule subglobose, bright yellow, trivalved, 3-6 seeded. Seeds yellowish brown, enclosed in red fleshy aril.

An oil of therapeutic value is extracted from the seeds. It is used in rheumatism, also taken to improve the memory.

Threat factors: Habitat loss, clearing of forest areas, collection of seeds in a large amount.

7. *Curculigo orchioides*: Herbs. Rootstocks tuberous elongate, covered with fleshy roots & remains of old leaves. Leaves very variable, linear or linear-lanceolate, thin but firm in texture. Flowers appear almost at the ground level, bisexual, yellow on a beak like hypanthium. Perianth 6-lobed. Fruits subulate to ovoid. Seeds many, globose.

Tuberous roots are used for skin diseases, as tonic, diuretic, demulcent, in piles, diarrhoea, jaundice & asthma. Roots fed to Varanus-bitten cattles.

Threat factors: Collection for medicinal purposes, drought, clearing of forest.

8. *Cyperus rotundus*: Perennials herbs, stems compressed, trigonous. Leaves 2-5 mm broad, bracts 2-4, foliaceous, spikelets 3-10 together, linear-lanceolate. Glumes reddish or deep brown. Stamens 3. Nuts glossy, black, trigonous.

Tuber is diuretic, anthelmintic, astringent, stimulant, useful in disorders of stomach and irritation of the bowels.

Threat factors: Collection for medicinal purposes, drought.

9. *Diospyros melanoxylon*: Deciduous trees with dark rough bark. Leaves ovate-elliptic, pubescent beneath. Male flowers in axillary, simple or branched 3-15 flowered, drooping cymes; female flowers solitary. Berries globose.

Leaves are carminative, laxative, diuretic and styptic. Decoction of bark is used in diarrhoea, dyspepsia; a dilute extract is used as astringent lotion for eyes.

Threat factors: Regular cutting of plant for broader leaves which are used for making "Bidis".

10. *Oroxylum indicum* (L.) Venten.

Trees, 10-15 m high, irregularly branched. Leaves usually tufted towards twig end; Leaflets ovate-elliptic. Flowers solitary on a tubercle, arranged in erect racemes. Calyx dirty violet. Corolla deep maroon, glandular inside. Capsules flat, pendent, tapering at both ends.

Seeds are sometime eaten. Rootbark useful in diarrhea and dysentery, as astringent and tonic.

Threat factors: Harvest for medicine. Traded for parts. Bark is unscientifically harvested without considering immature plants.

11. *Prosopis cineraria*: A small tree with grayish bark, armed with scattered prickles. Leaves bipinnate, leaflets 8 – 12 pairs. Flowers in terminal drooping spikes, yellow. Pods cylindrical straight torulose, seed dull brown. Bark paste is applied in wounds.

Pod is astringent. Bark is used in rheumatism and scorpion sting. Flowers pounded and mixed with sugar and eaten by women during pregnancy as a safeguard against miscarriage.

Threat factors: Cutting for fuel, forest clearance. It is also used in religious purpose eg. In marriage ceremony.

12. *Pueraria tuberosa*: Large woody climbers. Leaves 3-foliate. Flowers in axillary or terminal racemes, white. Drupes green, smooth.

Roots are emetic, tonic and used as demulcent, refrigerant in fevers.

Threat factors: Collection for medicinal purposes, drought, clearing of forest.

13. *Steculia urens*: Trees, about 8 m tall; bark peeling off in flakes. Leaves palmately 3-5 lobed. Flowers pale green within with bright red center, yellowish to yellowish – red without, scented, in glandular, pubescent terminal panicles. Fruits follicle, woody, covered with rusty brown stinging hairs; seeds black.

Gum in leaves in *Piper betel* chewed in stomachache. Gum traded at Rs. 200/Kg. Crushed bark fried in mustard oil used as balm in rheumatism.

Threat factors: Degradation of forest, habitat loss, Improper cutting of stem for collection of gum.

14. *Terminalia bellirica*: Medium sized trees. Leaves alternate, crowded at the end of branches. Flowers greenish-yellow in simple terminal, clustered spikes. Male flowers in upper part of the spike and bisexual in the lowers part. Fruit ovoid.

Fruits are bitter, astringent, tonic, laxative, antipyretic, used in piles, dropsy, diarrhoea, leprosy and dyspepsia.

Threat factors: Collection for medicinal purposes, drought, clearing of forest.

15. *Tinospora cordifolia*: Large deciduous climbers with lenticellate, corky stems. Leaves deeply cordate with large basal lobes. Flowers unisexual, Drupelets pisiform, deep red.

Whole plant is used in indigenous drugs.

Threat factors: Habitat loss, clearing of forest areas, collection for marketing.

16. *Urginea indica*: Herbs. Bulbs pale, ovoid, thick with a long neck. Leaves linear, ensiform, flat, acute, appearing after the flowers. Racemes erect, scape erects 30-4- cm long, brittle. Flowers distant, dingy brown, pedicels 3-7 cm long. Perianth greenish white, capsule ellipsoid, 6-9 seeded in each cell.

Bulbs are used as cardio tonic, stimulant, and expectorant, diuretic and for rheumatism but in large doses they are emetic and may cause depression. The alcoholic extract of bulbs is referred to possess some anticancerous properties. Leaves are eaten during the time of scarcity.

Threat factors: Collection for medicinal purposes, drought, clearing of forest.

15. Common Factors of Threat

Following Common Threat Factors are observed:

- Excessive collection by local peoples and traders for sale to pharmaceuticals. No germ plasm is left for further germination and propagation.
- Proper techniques of collection are not followed.
- Cutting of forest for fuel wood.
- Grazing / browsing by cattle.
- Continuous drought for a decade.
- Forest fire destroys herbaceous vegetation.
- Cutting / clearing of supportive species on which the RET species present.
- Unawareness about the importance of several species by local people.
- Fungal and pest attack on many plant species.
- Several exotic plants (some of them are noxious weeds) are lying in a well established stage in the forest. The invasion of some weeds has resulted in the replacement of many indigenous species. For example, *Lantana camara*, *Parthenium hysterophorus* etc. have encroached upon many localities of the forest.

16. List of Some Threatened Species of Chambal Region, Planted in Botanical Garden & “Charak Udyan” (For Ex-situ Conservation)

Sr.No.	Botanical Name	Family
1	<i>Abrus precatorius</i>	Fabaceae
2	<i>Acorus calamus</i>	Araceae
3	<i>Amorphophallus paeniifolius</i>	Araceae
4	<i>Andrographis paniculata</i>	Acanthaceae
5	<i>Aristolochia indica</i>	Aristolochiaceae
6	<i>Asparagus racemosus</i>	Liliaceae
7	<i>Bacopa monieri</i>	Scrophulariaceae
8	<i>Butea monosperma var. lutea</i>	Fabaceae

33	<i>Plumbago zeylanica</i>	Plumbaginaceae
34	<i>Prosopis cineraria</i>	Mimosaceae
35	<i>Psoralea corylifolia</i>	Fabaceae

36	<i>Rauvolfia serpentina</i>	Apocynaceae
37	<i>Rauvolfia tetraphylla</i>	Apocynaceae
38	<i>Saraca asoca</i>	Caesalpiniaceae
39	<i>Sauvagesia venosum</i>	Araceae
40	<i>Spilanthes calva</i>	Asteraceae
41	<i>Tinospora cordifolia</i>	Menispermaceae
42	<i>Tylophora indica</i>	Asclepiadaceae
43	<i>Uraria picta</i>	Fabaceae
44	<i>Urginea indica</i>	Liliaceae

17. Species of Academic and Educational Importance, grown in the Garden of Jiwaji University

Sr.No.	Botanical Name
1	<i>Abutilon indicum</i>
2	<i>Acacia catechu</i>
3	<i>Acacia nilotica var.indica</i>
4	<i>Acalypha indica</i>
5	<i>Achyranthes aspera</i>
6	<i>Adathoda zeylanica</i>
7	<i>Aegle marmelos</i>
8	<i>Albizia lebbek</i>
9	<i>Alcea rosea</i>
10	<i>Amaranthus spinosus</i>
11	<i>Amaranthus viridis</i>
12	<i>Amorphophallus paeniiifolius</i>
13	<i>Antigonon leptopus</i>
14	<i>Araucaria excelsa</i>
15	<i>Argemone mexicana</i>
16	<i>Argyreia nervosa</i>
17	<i>Artobotrys hexapetalus</i>
18	<i>Artocarpus heterophyllus</i>
19	<i>Asparagus gonoclados</i>
20	<i>Asparagus gracilis</i>
21	<i>Asparagus plumosus</i>
22	<i>Asparagus racemosus</i>
23	<i>Asphodelus tenuifolius</i>
24	<i>Averrhoa carambola</i>
25	<i>Azadirachta indica</i>

26	<i>Bacopa monnieri</i>
27	<i>Balanites aegyptica</i>
28	<i>Barleria prionitis</i>
29	<i>Bauhinia variegata</i>
30	<i>Bignonia incarnata</i>
31	<i>Bixa orellana</i>
32	<i>Boerhaavia diffusa</i>
33	<i>Bombax ceiba</i>
34	<i>Bryophyllum pinnatum</i>
35	<i>Butea monosperma</i>
36	<i>Caesalpinia bonduc</i>
37	<i>Caesalpinia pulcherrima</i>
38	<i>Calliandra emarginata</i>
39	<i>Calliandra haematocephala</i>
40	<i>Callistemon lanceolatus</i>
41	<i>Calotropis gigantea</i>
42	<i>Calotropis procera</i>
43	<i>Campsis radicans</i>
44	<i>Capparis decidua</i>
45	<i>Capparis sepiaria</i>
46	<i>Carrissa opaca</i>
47	<i>Cascuta reflexa</i>
48	<i>Cassia biflora</i>
49	<i>Cassia fistula</i>
50	<i>Cassia glauca</i>
51	<i>Cassia tora</i>

52	<i>Casuarina equisetifolia</i>
53	<i>Catharanthus roseus</i>
54	<i>Ceiba pentandra</i>
55	<i>Centella asiatica</i>
56	<i>Ceropegia macrantha</i>
57	<i>Chlophytum borivilianum</i>
58	<i>Chorisia speciosa</i>
59	<i>Cinnamomum tamala</i>
60	<i>Cinnamomum zeylanica</i>
61	<i>Citrus aurantium</i>
62	<i>Citrus maxima</i> var. <i>uvacarpa</i>
63	<i>Citrus reticulata</i>
64	<i>Clerodendrum fragrans</i>
65	<i>Clerodendrum inerme</i>
66	<i>Clerodendrum splendens</i>
67	<i>Cocculus hirsutus</i>
68	<i>Corchorus aestuans</i>
69	<i>Corchorus trilocularis</i>
70	<i>Cordyline terminalis</i>
71	<i>Crescentia cujete</i>
72	<i>Crinum asiaticum</i>
73	<i>Crotalaria medicaginea</i>
74	<i>Crotalaria retusa</i>
75	<i>Cryptolepis buchnani</i>
76	<i>Curculigo orchiooides</i>
77	<i>Cymbidium gegentum</i>
78	<i>Cymbopogon citratus</i>
79	<i>Cymbopogon martinii</i>
80	<i>Dalbergia sisoo</i>
81	<i>Datura metel</i>
82	<i>Datura stramonium</i>
83	<i>Delonix regia</i>
84	<i>Dendrobium enflenesence</i>
85	<i>Dendrobium nobile</i>
86	<i>Dendrobium spp.</i>
87	<i>Dendrocalamus strictus</i>
88	<i>Dichrostachys cinerea</i>
89	<i>Dillenia indica</i>
90	<i>Dodonea viscosa</i>

91	<i>Duranta repens</i>
92	<i>Eclipta prostrata</i>
93	<i>Ehretia laevis</i>
94	<i>Elytraria acaulis</i>
95	<i>Eugenia caryophyllus</i>
96	<i>Euphorbia dracunculoides</i>
97	<i>Euphorbia hirta</i>
98	<i>Euphorbia thymifolia</i>
99	<i>Euphorbia tirucalli</i>
100	<i>Evolvulus alsinoides</i>
101	<i>Ferula asafoetida</i>
102	<i>Ficus benghalensis</i>
103	<i>Ficus benghalensis</i> var. <i>krishnae</i>
104	<i>Ficus benjamina</i>
105	<i>Ficus elastica</i>
106	<i>Ficus palmata</i>
107	<i>Ficus racemosa</i>
108	<i>Ficus religiosa</i>
109	<i>Ficus repens</i>
110	<i>Ficus virens</i>
111	<i>Glycyrrhiza glabra</i>
112	<i>Gmelina arborea</i>
113	<i>Gmelina philippensis</i>
114	<i>Gomphrena celosoides</i>
115	<i>Gossypium spp.</i>
116	<i>Grevellia robusta</i>
117	<i>Grewia subinaequalis</i>
118	<i>Habenaria digitata</i>
119	<i>Helicteres isora</i>
120	<i>Holoptelea integrifolia</i>
121	<i>Indoneesiella echiooides</i>
122	<i>Iphigenia indica</i>
123	<i>Ipomoea batatas</i>
124	<i>Ipomoea eriocarpa</i>
125	<i>Ipomoea hederifolia</i>
126	<i>Ixora coccinea</i>
127	<i>Jacaranda momosaefolia</i>
128	<i>Jasminum auriculatum</i>

129	<i>Jasminum flexile</i>
130	<i>Jasminum grandiflorum</i>
131	<i>Jasminumrottlerianum</i>
132	<i>Jasminumsambac</i>
133	<i>Jatropha curcas</i>
134	<i>Justicia gendarussa</i>
135	<i>Kigelia Africana</i>
136	<i>Lablab purpureus</i>
137	<i>Lagerstroemia indica</i>
138	<i>Lantana camara</i>
139	<i>Lathyrus aphaca</i>
140	<i>Launea acaulis</i>
141	<i>Leucas aspera</i>
142	<i>Lindernia ciliata</i>
143	<i>Lindernia crustacea</i>
144	<i>Litchi chinensis</i>
145	<i>Madhuca longifoliavar. Latifolia</i>
146	<i>Mallus sylvestris</i>
147	<i>Mangifera indica</i>
148	<i>Manilkara hexandra</i>
149	<i>Melia azedarach</i>
150	<i>Mesua ferrea</i>
151	<i>Michelia champaca</i>
152	<i>Mimosa pudica</i>
153	<i>Mimusops elengii</i>
154	<i>Mirabilis jalapa</i>
155	<i>Morinda pubescens</i>
156	<i>Morus alba</i>
157	<i>Mulenbackiaplatyclada</i>
158	<i>Musa paradisiaca</i>
159	<i>Musa rosacea</i>
160	<i>Nerillea aragoana</i>
161	<i>Nerium indicum</i>
162	<i>Nicotiana plumbaginifolia</i>
163	<i>Nyctanthes arbor-tristis</i>
164	<i>Nymphaea nauchali</i>
165	<i>Ocimum tenuiflorum</i>
166	<i>Operculina turpethum</i>

167	<i>Opuntia elatior</i>
168	<i>Oraxylum indicum</i>
169	<i>Oxalis corniculata</i>
170	<i>Passiflora caerulea</i>
171	<i>Pepromia pellucida</i>
172	<i>Peristylus constrictus</i>
173	<i>Phoebe cerperiana</i>
174	<i>Phragmites karka</i>
175	<i>Phyllanthus amarus</i>
176	<i>Phyllanthus emblica</i>
177	<i>Phyllanthus maderaspatensis</i>
178	<i>Pilea scripta</i>
179	<i>Pinus roxburghii</i>
180	<i>Pithecelobium dulce</i>
181	<i>Pleomea reflexa</i>
182	<i>Plumeria alba</i>
183	<i>Pongamia pinnata</i>
184	<i>Pterospermum acerifolium</i>
185	<i>Punica granatum</i>
186	<i>Pyrostegia venusta</i>
187	<i>Ranunculus scleratus</i>
188	<i>Ravenala madagascariensis</i>
189	<i>Roystonea regia</i>
190	<i>Ruellia tuberosa</i>
191	<i>Russelia equisetiformis</i>
192	<i>Sapindus emarginatus</i>
193	<i>Sauvagesia venosum</i>
194	<i>Securinega leucopyrus</i>
195	<i>Sida acuta</i>
196	<i>Sida cordifolia</i>
197	<i>Sida rhombifolia</i>
198	<i>Solanum virginianum</i>
199	<i>Stewia rebaudiana</i>
200	<i>Striga angustifolia</i>
201	<i>Synadenium grantii</i>
202	<i>Syzygium cumini</i>
203	<i>Tabernaemontana divaricata</i>
204	<i>Tamarindus indica</i>
205	<i>Tectona grandis</i>

206	<i>Teramnus labialis</i>
207	<i>Terminalia arjuna</i>
208	<i>Terminalia bellirica</i>
209	<i>Terminalia catappa</i>
210	<i>Thevetia peruviana</i>
211	<i>Thuja orientalis</i>
212	<i>Thunbergia grandifolia</i>
213	<i>Tinospora cordifolia</i>
214	<i>Tribulus terrestris</i>
215	<i>Vanda tasselata</i>

216	<i>Vernonia elanginifolia</i>
217	<i>Veronica anagalis-aquatica</i>
218	<i>Vicia hirsuta</i>
219	<i>Withania somnifera</i>
220	<i>Xanthium indicum</i>
221	<i>Zamia pigmea</i>
222	<i>Ziziphus mauritiana</i>
223	<i>Ziziphus numularia</i>
224	<i>Ziziphus oenoplea</i>

18. Conservation Strategies:

It is not an exaggeration to say that forests are the lifeline of majority of the Indian societies particularly those living at and around villages. The management system of any forest actually maintains the resources of that area. Alcorn (1984) emphasized that once a species gets known as resources in any cultural groups it becomes an integrate part of that society. The impact of this knowledge on expansion, distribution and threats to that species plays a great role in making strategies for its conservation.

a. Rare and Endangered Plant species:

Vegetation of Chambal Eco-region is quite interesting due to varied geographic and climatic factors. During the survey made in various localities of the region, it was noticed that several plant species mentioned by earlier workers are either missing from their mentioned localities or have reduced in population. During the present study thirty-four species have been found to fall under various categories of threat such as Rare, Endangered, Threatened vulnerable etc. There are a good number of species, which require detailed study or they are data deficient. Out of these thirty-four RET species five are trees, four shrubs, sixteen herbs and ten belong to climbers.

b. Propagation of threatened plant species:

Propagation of a good number of RET species has been done in the medicinal plant garden of the Jiwaji University, Gwalior. These species have been propagated through seeds, rhizomes or tubers and stem cuttings.

c. Conservational practices by Tribals and other Rural peoples:

As such the tribals and other villagers do not cultivate any wild plant species. However, a few species of crops and vegetables are being cultivated in some pockets. They are totally dependent on forests products for their livelihood. Many tribals do not have any idea of rare plants and their importance. Some specied are not destroyed due to some taboos, faith or belief etc.

A good number of taboos and beliefs are prevailing among tribals. Due to their faith some plants are not harmed or cut for any purposes by some communities because they believe them the residence of their deities. Some times the fruits or leaves may be used on some special occasions, eg. *Emblica officinalis*, *Ficus benghalensis*, *Ficus religiosa*, *Ficus racemosa*, *Terminalia arjuna* *Mitragyna parvifolia* etc.

d. Sacred Groves in forest areas:

Inside the dense forest some pockets are still undisturbed and consist of several plant species. Tribals consider such areas as ‘Sacred Groves’ i.e. the residence of their deities. Any part of any plant is not taken out or harmed in any way. Such types of beliefs and faith have been helpful in conserving such floristically rich areas.

19. Protection and Conservation Plan for Flora:

Protection Measures

The vegetation in Chambal eco-region is diverse but greatly shranked in their density due to deforestation, habitat degradation, and dependence of tribal people on forest. Thus wildlife conservation includes measures to control above causes and improvement of habitat.

19.1: Protection Measures for Plants

The protection measures for plants mainly aims at minimizing the dependence of tribal people on the forest for their livelihood. Other protection measures are listed below:

- (1) Strict implementation of Forest Conservation Act, 1980
- (2) Provision of biogas plants in villages or cooking gas in residential areas to save forest from deforestation for fuel wood

19.2: Suggestions for the conservation of RET species:

- (1) Botanical gardens should be established in nearby localities of forests in all districts to impart education and training about medicinal plants and their conservation.
- (2) Seeds, tubers and other germ plasms should be preserved in a germ plasm bank.
- (3) Exploration should be done for confirming the occurrence of species as mentioned by earlier workers.
- (4) Nursery should be developed for production of seedlings and maintenance of germplasm of RET species.
- (5) Ex-situ conservation of RET species be done in labs and field.

- (6) “In-situ” conservation of RET species should be promoted in natural habitats.
- (7) Mono-crop Afforestation / plantation should be avoided to maintain the better habitat condition and ecological balance.
- (8) Natural habitats of RET species should be prohibited strictly for grazing and other activities.
- (9) Social forestry programmes should be encouraged to ensure the public participation in development of forest areas and other degraded localities.
- (10) Social awareness programme about the importance of flora and fauna and their role in upliftment of socio-economic aspects be organized regularly.

20. Training/Awareness programme:

- * World Environment Day was celebrated on June 5th 2005.
- * PI delivered a lecture on threatened plants of Gwalior and Chambal divisions for the trainees in Forest Dept. in August 2005.
- * Pre-CAMP Regional workshop on “Status of medicinal & other Economic plants of Chambal region” was organized on 22nd November 2005.
- * Teachers and students participated in plantation programme.
- * Students from local colleges and other cities visited the garden and made aware about threatened plant species.
- * PI and research scholars attended the CAMP workshop organized by MP State Biodiversity Board, Bhopal in January, 2006.
- * A national seminar on “Modern Trends in IPRs Issues with Reference to Science, Technology, Society & Commercialization” was organized from March 3-5, 2006.
- * XXXth Botanical conference: National seminar on “Emerging Trends in Plant science: Biodiversity, Biotechnology & Environmental Conservation” and National Symposium on “Relevance of Linnaean Legacy and Thoughts on Plant Diversity in his Tercentenary Years” was organized from 28-30 November, 2007.
- * Celebration of science Day on 28th February 2008
- * World Environment Day was celebrated on 5th June, 2008 in Charak Udyan.

Acknowledgements:

Principal investigator (Prof. Ashok K. Jain) and the entire research group of the project are grateful to the Madhya Pradesh State Biodiversity Board, Bhopal for initiating and encouraging research in Chambal Eco-region and providing financial assistance.

Thanks are also due to Hon'ble Vice Chancellor Jiwaji University and Head, School of Studies in Boatny, Jiwaji University, Gwalior for kind permission, constant help and encouragement during the tenure of the work. We are obliged to the Conservator of Forests, Range officers and all staff members of the forest department of Chambal and Gwalior divisions for constant help, facilities and providing information regarding forest localities.

The cooperation and help rendered by the villagers, tribals and local people shall be remembered for ever because in field it could not have been possible to carry out work without their help.

Prof. Ashok K. Jain
